FRUIT MERINGUE... For dessert lovers.

strawberries or peaches have been added.
And more good news for dessert-lovers! A jewel of a cookbook called FAVORITE DESSERTS has recently come out, published by the Chicago Home Economics in Business Group, Box 453, Chicago 90, Illinois, price \$1.50 plus 15c for handling when ordered by mail. It contains more than 300 recipes, including luscious cakes, frostings, cookies, frozen desserts, fruit desserts, pies, puddings, des-

sert sauces, and refrigerator deserts. Most important of all, because this cookbook was compiled by many of the country's leading home economists, you can be sure its recipes are absolutely reliable. Each contributor had to submit her favorite dessert, and there really are some delectable treasures here. Many of them are perfect for family dinners, others are worthy of holiday entertainment, and still others are just the thing for that shower - luncheon or that bridge club meeting.

SAVORY OYSTER STUFFING... Ready for the turkey.

By CECILY BROWNSTONE
Associated Press Food Editor

There is a jumbo crop of turkeys this year, the second largest on record, and so you may find it profitable to serve one of the birds at Sunday dinner and have the leftovers for the next week. It won't hurt to rehearse your turkey cooking techniques for the holidays ahead. Here's a recipe for savory oyster stuffing. For new cranberry favor use your favorite recipe for cranberry sauce, then add slivers of preserved ginger.

SAVORY OYSTER STUFFING

Ingredients: 1/2 cup butter or margarine, 1/2 cup finely chopped onion, 1/2 cup finely diced onion, 3/4 teaspoon tabasco sauce, 8 cups soft bread crumbs, 2 tablespoons minced parsley, 1 teaspoon salt, 1 cup poultry seasoning, 1 pint oysters or 1 sixteen-ounce can drained and chopped.

Method: Melt butter or margarine in a large skillet, add the onion and celery and cook over low heat until onion is yellow but not brown. Add the tabasco sauce, bread crumbs, parsley, salt, and poultry seasoning. Cook, stirring constantly, over moderate heat for about 5 minutes. Add oysters. Makes about 10 cups or enough stuffing for a 12-pound turkey.

If your family is small it may be that you can find one of the small Beltville Whites, or Jersey Buifs, in your market to cook at home. There's nothing better in turkey fare.

Cancer Studies Near To Doctors

Medical sci-
day when at
cancer can be

hormones, the normal cell growth pattern in the body is upset. Abnormal growth, or cancer, may result, so the theory goes.
When the hormones are working properly, the body functions properly, the scientists believe.

SCIENTISTS NOW ON TRAIL OF NORMAL PATTERN

Once it has been established definitely that hormone imbalance in the body is a definite cause of cancer, the goal will be to determine just what is a normal pattern of hormone production.
Scientists at Memorial Hospital, led by Dr. Konrad Dabiriner, one of the world's authorities on hormones, are now engaged in a \$500,000 project to determine the patterns of hormones excreted by healthy humans as compared to those who are ill.
Preliminary results show that certain amounts of hormones show up in normal specimens of all persons that do not appear in the normal pattern. The day may come when it can be determined if a person is becoming susceptible to a certain disease, say arthritis or even cancer, and then steps can be taken to avert the threat to health.

ELIMINATING THE CAUSE IS MAJOR GOAL

The elimination of the cause of cancer is the major goal of most scientists working in the cancer field. But first the causes must be determined. That does, steps can be taken to eliminate the cause.
Meanwhile, medical science stresses surgery, X-ray and radium for cancer. But none of these treatments eliminate the cause. In many cases they do eliminate the

North Carolina Recalls Gold Strike In 1799

KANNAPOLIS (UP)—The California gold rush 100 years ago helped settle the West, but 50 years earlier there was a North Carolina gold rush which eventually yielded \$20,000,000 worth of ore, and for a time was this country's principal source of gold.

Cabarrus county has just celebrated the 150th anniversary of the discovery of gold there.
A 12-year-old boy, Conrad Reed, found an \$8,000 gold nugget while shooting fish with a bow and arrow on his father's farm in 1799. He thought it was only a pretty rock and it served as a doorstop for three years before its value was discovered.

Then the gold rush began. The farm turned into a mine, and hard-bitten men dug gold in North Carolina for half a century.

The mines finally were abandoned when they became unprofitable and the richer western ores were discovered in 1849.

Cactus Apple Finds Market In East

SAN DIEGO, CAL (UP)—About the oddest crop produced in San Diego county is the cactus apple.

The three Maniscalco brothers have 30 acres planted in cactus. They call it spineless cactus but it has plenty of spines. Small ones, though.

The pickers wear long leather gloves, heavy canvas aprons that cover legs and body and a lot of footie.

Sam Maniscalco says they ship eight to 16 carloads of the sweet fruit to eastern points every harvest season.

"We use Mexicans to harvest because nobody else will do it," Sam says. The men climb ladders to reach the fruit, then slice it off with sharp knives. It's dangerous to fall.
The fruit itself is inside a prickly husk. That's the reason the sweet pulp went unpriced for so long. The flavor is a cross between pomegranate and watermelon, and like both of those fruits, there are countless seeds. The seeds are eaten along with the pulp.
Most of the fruit is shipped to the New York Italian colony.
Sam says the one compensation they find with their crops is that no one sneaks in to steal the fruit.

Gum Drop Bait Found Sure Lure for Mice

MILWAUKEE (UP)—Ed Batzner, head of a pest control service, hasn't built a better mousetrap but claims a better bait than ordinary cheese.

Batzner uses a gum drop. He says the mouse gets its teeth stuck in a gum drop and its neck stuck in the trap.

He claims he killed nine mice in one hour on a single gum drop. Batzner recommends that lemon flavored gum drops be used for best results.

EARLY TO BED—

NORTH GRAFTON, Mass. (UP)—John O. Nichols, just turned his 102nd birthday, believes in early rising. He gets up every day at 6:30 but it isn't so bad, he says, because he goes to bed at 7 in the evening. With 29 living descendants, Nichols still reads without glasses and shaves himself daily.

An electromagnet developed to further magnetism research is 40,000 times more powerful than the toy horseshoe magnet.

Treatment of cancer is necessary, the scientists believe, but the real goal is to "eliminate" the cancer even before it starts. The answer may be found in the hormone work.

LET 'EM EAT CRANBERRIES... With slivers of ginger

Sound Waves Offer New-Age Marvels

CLEVELAND (UP)—The use of sound waves so high they cannot be heard by the human ear is opening up the mechanical world to new frontiers comparable to the discovery of the steam engine.

That statement was made by Frank Massa, head of the Massa Laboratories, after reviewing some of the accomplishments of sound.

Among the great steps sound has made, he said, are:
Aging of whiskey that formerly took five years in only three hours.
Cleaning clothes in a washer without moving them, saving on wear.
Killing of bacteria in foods and medicines after they've been packaged.
Massaging internal molecules in humans to help cure such diseases

DOG WATCH FAILS

WAKEFIELD, Mass. (UP)—No longer head of a watchdog is Jim Richard, Rotherham of Melrose left Jim to guard his service station. Next day he found that while Jim was dogging it on guard duty, thieves had removed from the station nine radios worth \$300, a box containing \$1 in change and a pound of candy.

as arthritis.
Pasteurizing milk without heat, which takes some of the taste from the fluid.
"But we really know very little about inaudible sound waves except that they open up entirely new frontiers and the possibilities for use of supersones in chemistry and industry is tremendous," Massa said.

LAFF - A - DAY

"Never mind your mother—is the car all right?"

CONVERTIBLE SWEATERS

Save worn-out sweaters. A youngster's play-coat can be extra-fitted with it. Remove the buttons and sew the sweater inside the coat, and Junior will be extra warm for outdoor playing.

GOOD DAY'S WORK

GROVELAND, Mass. (UP)—During 33 years as a country physician, Dr. Elmer S. Bagnall recalls his busiest day as that on which he removed 23 sets of tonsils.

TAKE IT EASY

MEMPHIS (UP)—L. L. Wallace passed a group of men painting a railroad underpass and blinked when he saw this sign: "Men working slow."
