MRS. GEORGE F. WORLEY  
Mountaineer Reporter

Another working has been set for the Beaverdam Cemetery this Saturday. A good start was made by those who turned out last Saturday, but there are still many things to do to get ready to sow the grass seed. The women of the community are asked again to bring lunch for the workers.

One of the helpers at last Saturday's working, Bobby Ray Worley, cut his foot with an ax while helping to remove some trees from the cemetery. Eight stitches were required, and the injury will keep him from school. The son of Mr. and Mrs. Ray Worley, he is a tenth-grade student at Canton High.

**There is Nothing Finer than to Live in North Carolina**

"To live," in North Carolina in June, means many things—both work and play. It means statewide trout fishing season is on through August 31... It means the State American Legion Convention in Asheville May 31-June 3. It means High School, College and University Graduation Exercises. It means the Indian Drama "Unto These Hills" starts June 23 at Cherokee and the "Lost Colony" starts June 30 at the opposite end of the state in Manteo.

Whenever you can lay aside your daily chores, there is always something to see or do in North Carolina; and for refreshing relaxation any time, most of us can enjoy a temperate glass of beer—sold under our State A B C system of legal control that is working so well.

**A Farmer and HIS HIRED-HAND!**

Yes, there are more than two hundred different jobs that electricity can do on the farm and in the farm home—can do better and faster than they were done before. It is small wonder that successful farmers all over the Carolinas are turning more and more to electrical help to increase their profits and ease their work.

Carolina Power & Light Company fully recognizes the importance of electric service to the farmer and years ago pioneered in rural electrification in this area. The Company today serves more than 100,000 farms and this number is constantly growing as the Company's 100 million dollar building and expansion program progresses.
