

REPORT TO THE PEOPLE

By Senator Willis Smith

WASHINGTON — The past few weeks have been particularly busy for me. The Senate has been in session until eleven o'clock each night. I have had at least two meetings daily, each for an hour or more. There have been trips to New York for a radio broadcast and to a discussion of our new constitution.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report. It was the Congress that I was talking about in my report.

H-BOMB Workers Solve Housing With Trailers

A JET'S-EYE VIEW of Trailerville, S. C.

AP Newsfeatures

NEW ELLENTON, S. C.—Trailers play a big part in the development of the U. S. hydrogen-bomb here. It has been estimated that more than 10,000 house trailers are parked in the area. They are occupied mostly by workers in the project and subsidiary industries.

In many instances, the people who live in them have removed the wheels and installed water and sewer lines. Many of them have radios, TV sets or both.

Reason for the trailers starts with the fact that this corner of South Carolina is sparsely settled. They were brought in to supply quick housing for the workers.

An estimated 6,000 of the trailers are owned by the workers themselves. These families brought their homes with them when they came to work on the project. For the most part, they are parked in about 130 privately operated trailer parks. In most instances the workers brought their families along with their homes. Many of them are the property of construction workers who have found housing on construction projects, difficult.

Also we probably will appear before the Senate Military Appropriations subcommittee. As for the Blue Ridge Parkway, Senator Hoey and I are working to have an appropriation provided for completing this project. No

cut and who have therefore arranged to supply their own. These families are used to trailer living.

Another group of workers is housed in four huge rental trailer parks. For them, trailer living often is a new experience. In these big parks a trailer rents for \$60 a month. The units contain a living room-dinette, a bedroom, a kitchen and a bath. It will sleep four. The kitchens are complete with range and refrigerator and the bathrooms have showers.

The availability of trailers for rent helps recruit workers, the AEC has found. The housing headache here has been faced on other government projects. It has been found that having his family with him helps a worker's morale. The parks here are all operated by private companies or firms. An estimated 39,000 construction workers have been housed. Many of them are expected to be needed for the next three years.

The trailers have helped reduce the need for big government towns such as were built at Oak Ridge, Tenn., Richland, Calif., and Los Alamos, N. M.

money whatsoever for new construction on the parkway was included in the budget recommendations.

The parkway will bring thousands of tourists and millions of dollars into our State each year. Since the government has spent so much already on the parkway, it seems to me to be "penny wise and pound foolish" to fail to provide the relatively small amount necessary to complete the project.

Morning Star News Events

By MRS. ELDON BURNETTE

Bobby Plemmons, son of Mr. J. S. Plemmons, has returned from Korea and will be discharged shortly.

Mrs. Martha Smathers, who has been confined to her home for some time, is able to visit her daughter, Mrs. Lock Smathers, near Enka.

Mr. and Mrs. Lane Medford and children spent the weekend in Greenville, S. C., visiting relatives.

Mr. and Mrs. T. M. Presley, Jr., are building a new home on Dutch Cove Road.

People in the community are proud and happy to see a new road being constructed on Chestnut Mountain.

Friends of Mrs. Charlie Mease are glad to know she is able to be out after spending several weeks in bed with a bad leg.

About 15 per cent of average coal is ash.

In AF School

A/3c Howell C. Brown, son of Mr. and Mrs. Glenn D. Brown of Clyde, has entered the Airplane and Engine Mechanic's School at Sheppard Air Force Base, the home of the largest technical school of this type in the world.

During his specialized training as a student at Sheppard he will receive intensive training designed to provide him with the thorough knowledge and basic skills required in servicing, inspecting and maintaining aircraft currently used by the United States Air Force.

Upon graduation he will be awarded the rating of Airplane and Engine Mechanic.

Howell is a graduate of Clyde High School. He entered the Air Force January 28, 1953.

British Tradition In U.S. Strong, Expert Says

By JANE EADS

WASHINGTON (AP)—Dr. Louis B. Wright, director of the Folger Shakespeare Library here, said he was going to celebrate the 389th anniversary of Shakespeare's birth by talking about British tradition in the U.S.

Americans should be interested in the subject, he said—"Much that we take for granted today as 100 per cent Americanism is a direct inheritance from the British... this tradition, which gave us our language, our concept of law, our fundamental code of ethics and morals and many of our manners and customs, has persisted from the first settlement of America."

"Some Englishmen will maintain, of course, that Americans actually speak a different language," he said, "but they ought to remember we have retained many vigorous words and colorful usages which the pallid and elegant grammarians of the Victorian period threw out in England. These 'Americanisms' are often excellent usages preserved from the past and have better genealogies than many new-hatched words in England."

Dr. Wright pointed out that Americans also took over English literature as their own and have vastly profited from it. Shakespeare has been read by millions of Americans, he added in the way of example, and they have received not only "esthetic enjoyment but a great deal of moral instruction."

"Indeed, we Anglo-Saxons have sucked morality from our literature as a bee sucks honey from sundry flowers," he said, pointing out that Shakespeare was performed and read on the American frontier long before many of the elements of civilized life reached the wilderness.

"Even more influential on American ideas and literary style was the King James version of the Bible, a book which pioneers frequently carried in their luggage and earnestly read."

Households which had no other reading matter provided a literary education for their children out of the Bible, Dr. Wright said, and prairie politicians quoted it and Shakespeare to prove their eligibility for office. Country editors ornamented their newspapers with its passages.

"While a few years ago it was fashionable to condemn traditionalism," Dr. Wright said, "the stresses in society have shown some of the strengths which we inherited from the past, and now we are turning back more and more to study our own early history and the history of the even more distant past."

The U. S. Reclamation Bureau built 110 storage dams and 63 diversion dams from 1902 to 1952.

The surface of the Baltic Sea is slightly higher than that of the ocean.

Canton Soldier Elevated To Corporal's Rank

KOREAN BASE SECTION — James R. Cole, Rt. 3, Canton, was recently promoted to corporal with the 526th Engineer Utilities Detachment in Korea.

The 526th is part of the Korean Base Section, which provides supplies, services, transportation and communications to UN forces in the front line areas.

Corporal Cole has earned the UN and Korean Service Ribbons since arriving in Korea in November 1951.

The North Carolina soldier is a former student of Bethel High School.

Pointed Arrest

STERLING, Ill. (AP)—A Sterling citizen, in exercising his right to arrest a wrong-doer, so frightened the offender that the latter fled, leaving his automobile behind.

The Sterling man, driving his pickup truck, was almost struck by an out-of-town motorist who ignored a stop sign. Both vehicles stopped. The truck driver confronted the motorist with, "You're under arrest." To back up his statement the truck driver pulled a knife. The offender leaped from his car and fled.

The Sterling driver took the keys from the other auto and lodged a complaint with police. When the out-of-town offender inquired of police about his car the complaint was served. He paid a fine for failure to yield the right-of-way.

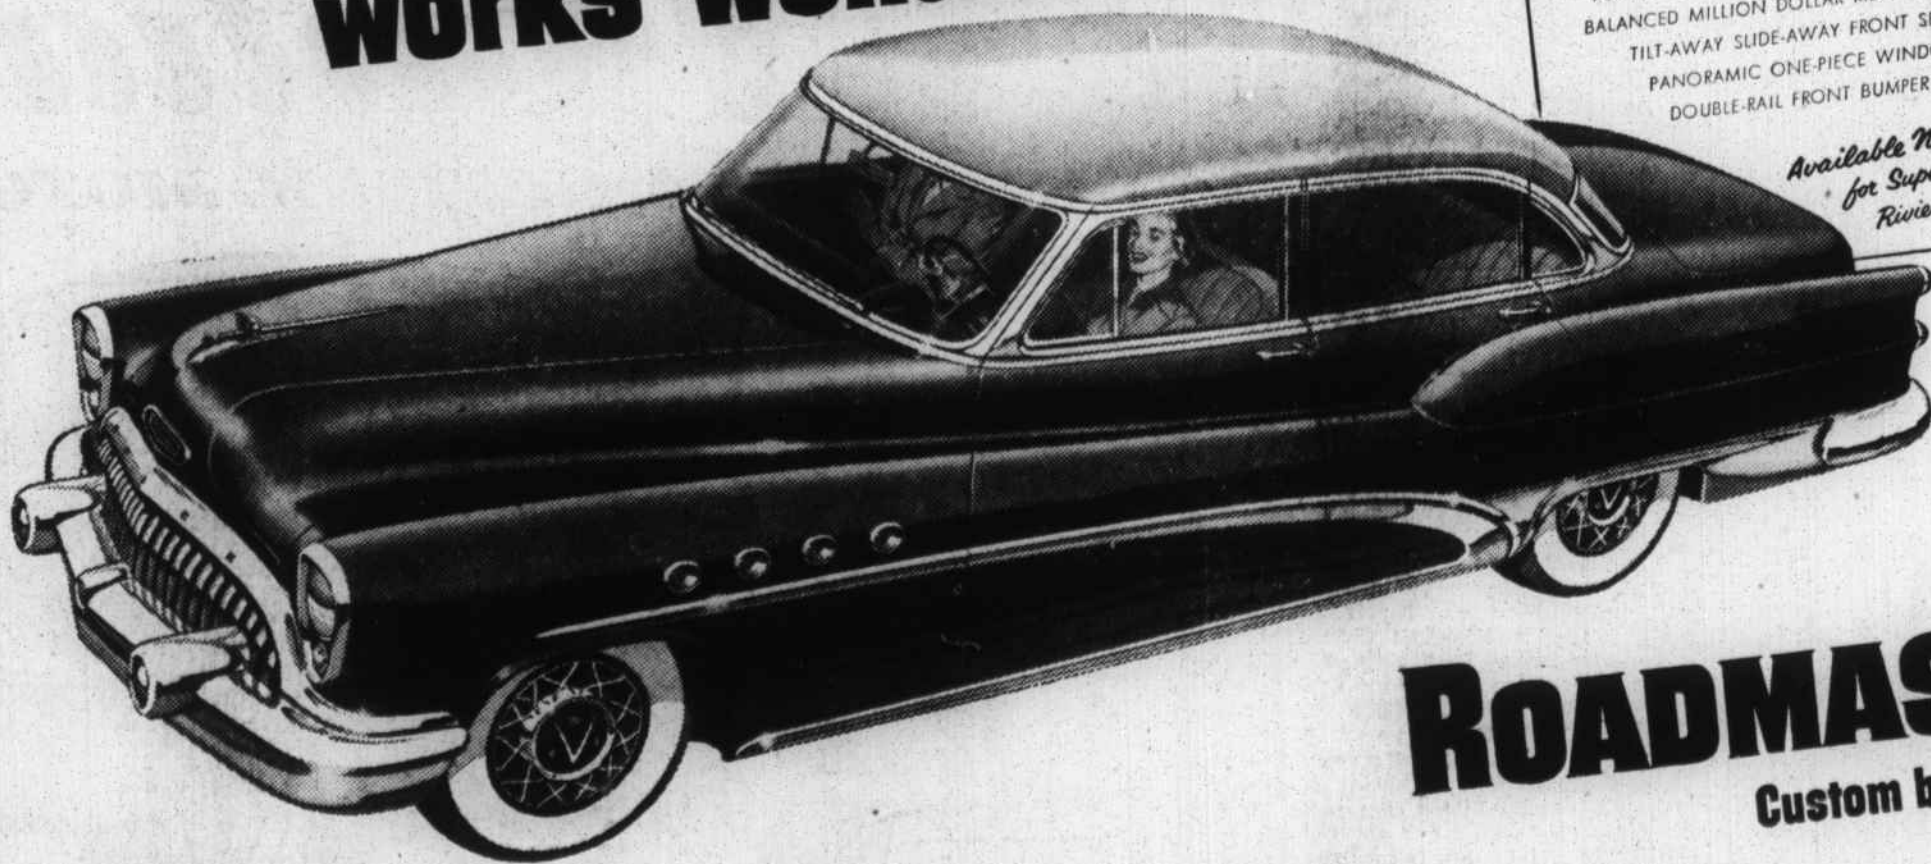

No charge was filed for the pointed method of arrest.

alism." Dr. Wright said, "the stresses in society have shown some of the strengths which we inherited from the past, and now we are turning back more and more to study our own early history and the history of the even more distant past."

A woman's touch works wonders here

- World's only car with all these features:
- V8 VERTICAL-VALVE FIREBALL ENGINE • POWER STEERING
- TWIN-TURBINE DYNAFLOW • DYNAMIC FLOW MUFFLER
- POWER BRAKES • COMPLETELY NEW SWEEPSPAR STYLING
- BALANCED MILLION DOLLAR RIDE • CUSTOM-RICH INTERIORS
- TILT-AWAY SLIDE-AWAY FRONT SEATS (2-door models)
- PANORAMIC ONE-PIECE WINDOWS FRONT AND REAR
- DOUBLE-RAIL FRONT BUMPER • AIRCONDITIONER

Available Now! for Super and Roadmaster Riviera and Sedan models at extra cost.

Television treat—the BUICK CIRCUS HOUR—every fourth Tuesday

ROADMASTER Custom built by Buick

JUST finger-tip pressure on the steering wheel lets her park and slow-manuever with far less effort.

For Power Steering — standard equipment at no additional cost on every 1953 Buick ROADMASTER—gives her easy turning of the front wheels, even when this two-ton automobile is standing still.

Just a toe-touch on the gas pedal gives her dazzling getaway, or gentle cruising pace, or soaring power to glide easily up the long, steep hills.

For Twin-Turbine Dynaflo and the world's newest V8 Engine give her a combination of quick, quiet getaway and infinite smoothness that no other car in the world can equal.

She can gentle this big, beautiful bundle of high-powered energy to a swift, sure halt with merely light pressure on the brake pedal—for Power Brakes* reduce needed pedal pressure by 50%.

She can replace summer's humid heat with refreshingly cool air by a flip of a switch—

for Buick Airconditioning circulates up to 300 cubic feet of cooled, dustless, filtered, draft-free air per minute.

Actually, the wonders—and the thrills—never seem to cease as you drive this superb ROADMASTER—the greatest Buick in fifty great years.

We'd like both the Mr. and the Mrs. to see it, try it, judge it. Why not drop in this week?

*Optional at extra cost on Roadmaster and Super models only.
