Do you know this about telephone taxes? You may not realize how large a part of the money paid by telephone users goes to taxes. Including the federal excise tax, a total of 29¢ out of every dollar received from Southern Bell customers last year was paid out in taxes to federal, state and local governments. To put it another way, the average amount of taxes was \$2.91 a month per telephone. Telephone taxes are necessary to the support of government, but they do mount up. Higher taxes of course have effect on the price you pay for telephone service. The next time you pay your telephone bill, remember that a good part of it is taxes for government and national defense.
