## TODAY'S BIBLE VERSE

Yet for love's sake I rather beseech thee, being such an one as Paul the aged, and now a prisoner of Jesus Christ .-- Philemon 1:9.

# **Editorial Page of The Mountaineer**

we love one voiher, nothing, in arm us, whatever mischances

# **Expensive But Worth It**

We knew painting was expensive, but little did we realize that it cost \$50 a mile to paint the little white skip line down the center of the highway. Neither did we'realize that it cost \$72 per mile to paint the solid yellow line beside the white center line.

Regardless of the expense, the center lines in the highways are worth their cost on foggy nights, when the lines are the only things visible to the harassed motorist.

## **Time For Extreme Caution**

As Halloween rolls around, many people get the mistaken idea that the occasion automatically grants them a special privilege to destroy public and private property.

Last year some who had this mistaken idea built fires on school grounds, and one marksman tried his ability in shooting out window panes in a school. Such dangerous practices are what officers will be on the lookout for this Saturday evening.

No one begrudges celebrants having a good time, but when they over-step the bounds and substitute dangerous practices for a good time, then the law enforcement officers will take a firm hand.

## **Girl Scouts**

The fund appeal of the Girl Scouts of Haywood is one to which we can all respond wit." full confidence that our contributions will be used in one of the most worthwhile and valuable programs available to girls.

The good will and public confidence which the Girl Scout organization enjoys both here in Haywood and in communities across the nation is not just a happy accident. It results from a well-developed and creatively presented program which fill basic needs of our young people-the need to express growing personalities through working and playing together : the need to make decisions that involve them and to abide by the consequences; the need to broaden their outlook through learning more about their own community and the world they live in.

The Girl Scouts have become so integral a part of our American way of life that it is difficult to imagine this area without them, and wet it is a truism that the things granted. We too easily assume that the trainwe value most we are most likely to take for ing our youngsters get through Girl Scouting will continue to be provided for themwhether or not we give the program our active support.

# **A Sound And Practical Decision**

Few groups have shown as much enthusiasm and energy over a project as have the promoters of the Waynesville Horse Show.

The group received but little encouragement when they first mentioned staging a horse show last August. Before long their enthusiasm spread, and others caught the spirit, and when the show was over, the unanimous acclaim was that it was the best event of its kind ever staged in the area, and the people were clamoring for another show in the summer of 1954.

The show last August seemed to instill in the promoters even more enthusiasm, and they started out to work on the 1954 show. Their growing list of commitments of high ranking show horses already assures the venture next summer as being much larger and finer than their first show.

Tentative plans were to have the horse show ring moved and built on a larger scale' on the 20-acre tract recently acquired by the county for the Home Arts and Livestock buildings and show grounds.

After first one thing then another, the horse show sponsors decided that it would be best to have their own property, and be independent of outside regulations. They felt that the show was off to such a good start that they could not afford to jeopardize its future success by being bound to regulations and stipulations over which they had no control.

With that idea in mind, the group have purchased a 20-acre tract in town, and plan to develop about 5 acres, and deed the other 15 acres (free of charges and obligations, to the Town of Waynesville for recreational purposes.

The proposition appears practical, and sound. It has the ear marks that will assure this community of one of the biggest and best horse shows in the state.

### The Menace Of Rabies

Haywood seems to have had more than her share of rabies this year. with four animals dying from the dreaded disease since September first.

Four people were bitten by one rabid dog, and these together with six others, had to take shots as a precaution against taking the fatal disease.

The health officers, together .with law enforcement officers, have worked faithfully in trying to curb the spread of the disease, to the point of demanding vaccinations, and keeping animals up during the quarantine period.

Rabies is among those diseases which medical science has not been able to fully conquer after a person has once contracted the disease. Up to now, medical science has been able to provide an effective vaccine that

humans.

Fifteen years ago this fall, another rabies expansion during a single year reepidemic hit Haywood.

This is a matter of life and death, and should be treated accordingly.

In Kansas City, a woman's habit of carrying a knife in her handbag saved the life of a boy who slipped while playing with a rope knotted around his neck. As he dangled from a tree, the lady passer-by produced the knife. and a rescuer cut the rope. The marvel is. not that she had a knife in her handbag, but that she was able to find it in time.

INDUSTRYWISE, A LEAD TO MAINTAIN

It is welcome news, of course that industrial investors spent more money on new plants and equipment in North Carolina last

On the other hand, the figures offer no basis for unrestrained reioicing or prideful complacency. They reflect, in fact, a leveling-off trend that could be damaging to the Tar Heel economy unless it is recognized and steps taken to restore the former vigor of our industrial advance.

North Carolina's pre-eminent position in the new industry totals is not a newly-come honor. The state has ranked first among its Southern neighbors in that respect for a number of years. During recent years, however, other states in Dixio have been developing more rabidly than our own, and narrowing the margin of our leadership

In 1947, the last year for which complete census reports on manufacturing are available the industrial investment in North Carolina was \$137.5 million. Thus the annual increase, last year, was only \$35 million,

Yet, in nine of the other 11 states in the comparable group, the 1952 investment was from \$7 million greater than it was in 1947

Only in Marvland and Virginia, both of which slipped backward in the comparable totals, was either the total gain or the percentage of gain less than it was in North Carolina.

In South Carolina, for example, the industrial investment increased from \$61 million in 1947 to \$94 million in 1952; in Tennessee from \$83 million to \$110 million; in Kentucky from \$77 million to \$129 million

Admittedly, the current statistics are not a totally reliable index of industrial progress, or of its relative pace. And actual dollars invested don't tell the whole story. But in their gratification over North Carolina's continued industrial leadership, North Carolinians should not lose sight of the fact that the race is still unresolved. ----

And now. if ever, we need new speed .-- Charlotte Observer.
