event is taking place on High campus this Saturday, February 5. The first time since any of us can remember, school is on Saturday. This is to make up for the time we were forced to miss because of snow. Games are also being played on February 19 and mark those dates on your calendar.

Indian Payoff Lauded

WOOD RIVER, Ill. (AP)—"The Indian was a smart cookie," says Mrs. Frank Lamanski who plans to file with the U. S. Department of Interior as a reservation-born American. "He was canny enough to demand payment for what he had already lost."

Upon registration with the department, she will stand to receive about \$15,000 as her portion of the amount to be paid to the Comanche tribe for tribal lands.

A one quarter Comanche, Mrs. Lamanski is the great-granddaughter of Quannah Parker, described by her as a fine example of the noble redskin who took at least 100 white scalps.

Cooper, editor, is still receiving congratulations. The staff has worked especially hard this year and some very good issues of "Bear Tracks" have been issued.

The annual staff wishes to remind you that it's about time everyone was buying his annual. A great many have been sold so far, but we're sure there are a lot of you who have been putting off paying for your **Black Bear**. Now is the time to buy them, so bring your four dollars to Mrs. Messer or some member of the annual staff. Don't forget!

Cancer Film To Be Shown In Hazelwood

A close-up view in full color of the surgical removal of a disabled lung is the climatic point in a hard-hitting film on lung cancer to be shown February 6 at 7:45 p.m. at the Hazelwood Seventh-Day Adventist Church, 106 Beech St. in Hazelwood.

The public is invited.

Shown under the auspices of the Carolina Conference of Seventh-Day Adventists, the film, "One in Twenty Thousand," was produced in New Orleans at the famed Ochsner Clinic with Dr. Alton Ochsner, one of the nation's most noted lung cancer authorities, appearing anonymously.

Emphasized in the film is Dr. Ochsner's prediction that by 1970 about 18 per cent of all people having cancer will have cancer of the lung—almost one in five. This is contrasted with only one percent in 1920, and 8 percent in 1948.

Preliminary announcements call the semi-documentary production "an honest film." All medical personnel are medical workers in real life and play themselves in the film. Scenes showing the precision work of a surgical operation were not staged, but were taken during actual surgery.

Beginning with the story of a heavy-smoking, small-town newspaper editor who gets a disturbing report on his personal visit to the mobile chest X-ray unit in his town, the film carries the editor through all the steps of consultation to the dramatic operation that saves his life.

Longhorns In Zoo

SAN DIEGO, Calif. (AP)—The San Diego zoo counts two Texas longhorn steers named Villa and

Lobos, among its new attractions. They were brought here from the federal government's Wichita Mountain refuge near Cache, Okla. Zoo officials said the 230 there represent about the last of the

sturdy breed, developed from cattle brought to the new world in the 16th century by the Spaniard Villa Lobos.

The zoo said it is the only one in the west exhibiting longhorns.

People have come from far and near to share in the values being offered at Hale's going out of business sale.
