TVA Ammonium Nitrate Still Available Here

Supplies of TVA ammonium nitrate for use on pasture grasses and winter cover are still available to Haywood County farmers, according to A. W. Ferguson, ASC county manager.

The purchase of the ammonium nitrate does not affect a farmer's ACP assistance since the chemical is provided by the TVA, Mr. Ferguson explained.

The nitrate costs \$3.40 per bag—a reduction in price of 16 per cent, and is supplied at the rate of from a bag and a half to two bags per acre. The maximum is two tons per farm.

SENATOR SAM ERVIN SAYS

(Continued from page 4)

two basic groups: (1) the ready reserves, which will take part in 48 drills annually and attend camp two weeks each summer; and (2) the standby reserves, which will not be given further training. Teen-agers volunteering for training under the reserve bill will be exempt from the draft.

The reserve is to consist of persons discharged from the regular Armed Services as well as those volunteering for service under the reserve bill. The bill provides, however, that those who entered the regular Armed Services before the enactment of the reserve bill from the service unless they volunteer to enter the ready reserves. ers will participate in referenda. In by reserves upon their discharge. Since no requirement of further training existed at the time these persons entered the regular service, we felt that any other course would be breaking faith with them. The changes made in the reserve training plan by the Senate will not become effective unless they are approved by the House.

The reserve training plan will contribute much to the national security. It will afford us for the first time in our history a reserve which can be speedily prepared for combat in case of necessity.

FARM VOTE

On Saturday, July 23, flue cured tobacco farmers and peanut farmers will participate in referenda. In the tobacco referendum, flue cured tobacco growers will have an opportunity to vote for or against marketing quotas for their tobacco and a 10c per acre assessment to assist Tobacco Associates, Inc. in promoting export sale of flue cured tobacco. If the flue cured tobacco farmers vote against marketing quotas they will lose the benefit of price supports.

In the peanut referendum, peanut farmers will decide whether they favor a 2c per hundred pounds assessment to promote all phases of peanut production, marketing, processing and other activities of concern to the peanut industry.

I believe that the best interest of flue cured tobacco farmers and peanut farmers will be promoted if the farmers concerned cast their votes in favor of these assessments and the marketing quotas for flue cured tobacco. Price supports have been a great boon to tobacco farmers, and have operated for many years without loss to the Government.
