The hope of the righteous shall be glad-but the expectation of the wicked shall crish. - Prov. 10:28. Voters Of Waynesville

### And Hazelwood to Act Tuesday On Recreation Commission's Report

Down through the years, this community has discussed a recreation program perhaps more than any one other project.

It has been the topic of discussion at Chamber of Commerce meetings, civic groups, and among individuals.

So enthusiastic did the citizens become in the subject back about 10 years ago that almost over-night several thousand dollars was raised for a full-time recreation program. A trained man was brought in, and the Armory converted into a recreation center,

Things went fine for the first year, and then when it came time to "pass the hat" for the appropriation the second year, things were not so lovely. Some contributors did not feel that the program was worthy of continuation because of several factors, none of which reflected on the need, nor the general plan.

Those in charge of the program saw their dreams fade, but from the experience, decided that the only practical way to have a recreation program was under a tax-supported plan. This idea was the unanimous thinking of leaders of the program. And from that experience, was born the idea of seeking a full-time recreation program, and facilities that would be assured of maintenance and operation through a nominal tax.

The idea was frequently discussed off and on for six years, and then the Jaycees provided the energetic enthusiasm and urged that something be done.

Their idea was taken before others, and consequently, more enthusiasm was generated.

Taking the experience of 1945, plus the enthusiasm of the Jaycees, the ideas revolved around calling in the State Recreation Commission for advice, leadership, and ideas.

The demand for the recreation program then began to take on the aspect of more seriousness, and so much so, that three groups put \$3,200 in cash into a fund to provide for a recreation survey of the community as suggested by the State Commission. The money was provided by Heinz Rollman, The Dayton Rubber Company, \$1,000 each, and \$1,200 from the Jaycees.

This action prompted the boards of aldermen of Waynesville and Hazelwood to take formal action on January 20, 1953, and named a special Recreation Commission, with five members from each town, and the commission naming the 11th man as chairman.

The Commission, already enthused by what they had learned and from the stimulant of countless meetings on the subject, followed the suggestion of the State Com-

mission and employed a recreation engineer to make a complete survey of the recreation needs of this community.

The Commission employed Charles M. Graves, of Atlanta, who had successfully planned and completed several recreation projects in this and other states for areas the size of this community.

Mr. Graves and his associates made their survey, and presented a comprehensive report of more than 100 pages in late spring.

The report was well received, and again, the citizens felt that before long, a recreation program would be under way in this community.

The proposals of Mr. Graves were for a long period, and would take care of the recreation needs of the community from now on. The total cost of the program, for construction was estimated at about \$450,000. This, it was agreed, might be a little expensive for an initial project, but the entire project was master-planned whereby it could be built in units from time to time, under an overall, long-range program.

The commission spent months studying the proposals of Mr. Graves. Under the ordinances setting up the commission, they are charged with the responsibility of providing and administering a recreation program for this community.

The commission went into every phase and detail of the program, and means as to how to get money for the initial project.

Their conclusion was that to look ahead, they should acquire the 40-acre site suggested by Mr. Graves. The property is on Pigeon Street, and known as the Shelton property. It is the only site Mr. Graves put into his report as being suitable from the recreation center for the area.

The property cannot be bought direct, since it is tied up in a will of the late W. T. Shelton. To acquire the land would mean going through a court of appraisal, which of necessity prevents a stated price at this time from being placed on the land.

That obstacle keeps the commission from saying "we shall pay this for land, and spend this for this project and this sum for the

county, the commission is unable to tell in detail just what they can give the people for the \$175,000 which the dual bond issues calls for in the election on Tuesday, August 9.

The most the commission can assure the voters is that they hope to get the property, and build a modern swimming pool, and perhaps some other things as specified in the Grayes' recommendations.

The commission wish they could be definite, but under circumstances they cannot. In fact, that has been one reason they have waited this long to ask the officials of the two towns to call an election on the matter. The commission has worked hard and long on his project, and it must be realized that Rest Home in Waynesville, is of published by Hugh Morton of Lintheir only remuneration is the fact that they are giving the community the benefit of their business experiences in trying to lead in beauty of Haywood County. a forward step and provide needed recreation facilities here.

Since the commission is charged with providing recreation facilities, they decided to County scenes: ask for the \$175,000 bond issue. With the money, they hope to acquire the land, and luska, Maggie Valley, Mount Sterl- of Lake Logan-one of the most go just as far as possible towards the ultimate in a modern and beneficial recreation ty Hospital, Waynesville postoffice. peal to every group in the com-

The proposal of financing the program is for 20 cents per \$100 be added to the tax rate of the two towns for payment of the bonds and interest, and another 10 cents per \$100 valuation for operation costs.

The commission has worked hard. They have given their best solution to the problem by asking for the bond issue. The commission is to be commended for their work, and it is readily understood why they cannot present a complete program of expenditures down to the last penny

Now the time has come-Tuesday. August 9 - when the voters of Waynesville and Hazelwood will approve the program of the 11-man commission by voting for the bonds, or else turn down the proposals of the commission for giving this community a recreation center by voting against the bond issue.

It would hardly appear that we would know any more about the program if the study were continued. Therefore, the whole matter now rests with the voters. The commission has done a good job, sincere and thorough.

After a meeting with the Hay- ginning at 9 a.m. wood County farm tour group in Fresh vegetables, homemade pies don't take a lot of Kansas City July 26, former president Harry S. Truman told County Agent Virgil Holloway: "They're ground fund for the school, my kind of people."
