WEDNESDAY—  
7:30 p.m.—Prayer Meeting.

**The Church in Europe** ILLUSTRATED SUNDAY SCHOOL LESSON  
Scripture—Acts 18:28-18:22. By Alfred J. Buescher

Before starting his second missionary journey, Paul and Barnabas disputed about taking John with them. Paul said no. Finally Paul took Silas and Barnabas took John.

Forbidden by the Spirit of Jesus to preach in Asia, Paul had a vision in the night of a man of Macedonia, asking him to come to Macedonia. Then Paul took ship to Europe.

In Athens Paul saw an altar with the inscription, "To the Unknown God." Paul told the Athenians of the living God and of Jesus Christ. Some scoffed; others said they would hear him further.

When Jews in Corinth jeered at Paul's teaching he went to the house of Crispus, chief ruler of the synagogue, who believed and all his house with him. MEMORY VERSE—Acts 18:9-10.

**Church of Christ**  
East on Highway 19A-23  
Across from REA Building

## ENTER the \$100,000 HOUSEPOWER CONTEST!

**FIRST PRIZE: \$10,000!**

Other Prizes of more than 1,000 Electrical Appliances! It's easy—nothing to buy. Fill out Entry Blank and find the answers to easy questions under "Quick Facts about HOUSEPOWER."

**Quick Facts about HOUSEPOWER**

Today, the average home uses 3 times as much electricity as it did 15 years ago. That's why 4 out of 5 homes now suffer from low HOUSEPOWER. This is true even of brand new homes. Here are the conditions that cause you to have low HOUSEPOWER:

- Inadequate electrical service entrance. To overcome this basic cause of low HOUSEPOWER, you should have service entrance capacity of at least 100 amperes. This requires 3-wire service from the street.
- Overloaded circuits. Too many appliances on one circuit overload it and none of them get enough power. Motors may even burn out. If the overload is too great, the fuse will blow or circuit-breaker trip. You should have enough branch circuits to distribute enough electricity to all appliances.
- Insufficient outlets. Some homeowners use extension cords and "octopus" outlets (2- and 3-way plugs), or plug into lighting outlets. Such practices are unsightly, inconvenient, and may be dangerous. Rearranging furniture doesn't help. The only safe solution is to add more circuits and outlets.

These are the symptoms of low HOUSEPOWER: lights dimming when appliances are turned on; blown fuses or tripped circuit-breakers; TV pictureshaking when other appliances are turned on; appliances working inefficiently or taking too long to heat up.

If any of these symptoms are present in your home call your electric company, electrician or electrical contractor for a wiring check-up. If added wiring is necessary, your electrician or electrical contractor will do the job quickly, neatly, economically. It often takes less than a day. Remember, full HOUSEPOWER increases the value of your home.

**CONTEST RULES**

**WHO MAY ENTER:** Any user of electricity in their place of residence in the continental U. S. or Hawaii except employees (and their immediate families) of Electric Power Companies, Electric Leagues and Associations, their Advertising and Contest Agencies.

**DURATION OF CONTEST:** The first of the five monthly contests begins May 1, 1956. Entries must be received no later than last day of month to be eligible for that month's contest. Entries received after last day will be included in following month's contest.

**FINAL MONTH'S CONTEST:** Sept. 30, 1956. Entries postmarked after Sept. 30, 1956 or received after Oct. 5, 1956 will not be accepted. Multiple entries will be accepted, provided an Official Entry Blank is used each time. Entry blanks may be obtained from local Electric Power Company.

**HOW TO ENTER:** Read carefully "Quick Facts About Housepower." Fill in complete entry blank below. Answer all questions. Fill in your name and address twice. Mail entry blank to "HOUSEPOWER CONTEST," P.O. Box 1888, Grand Central Station, New York 17, N.Y.

Judging will be done monthly by the Contest Division, Richard Manville Research, an independent research organization. Judging will be based on most correct answers to the multiple choice questions, and the degree of clarity, aptness, originality, and simplicity of the statement completion. Grand prize winner will be selected from the 25 top prize winners (five of Electric Power Companies, Electric Leagues and Associations, their Advertising and Contest Agencies).

Monthly winners will be notified by mail approximately 6 weeks from closing of each month's contest. Only one prize per household per month. Grand prize 1956. Winner will be notified approximately 10 weeks from final closing date. Winners' lists may be obtained by enclosing a self-addressed, 6-cent stamped envelope with your entry.

Contest is subject to federal, state, and local regulations. All entries become the property of Edison Electric Institute. Judges' decisions are final.

Each contestant consents and agrees that neither the sponsors of this contest, nor the Contest Division of Richard Manville Research, nor any of their respective employees, will incur any legal liability for any negligence, error, act, or failure to act in the sponsoring or conducting of this contest or the handling, however, all due caution will be exercised to prevent the occurrence of any such errors.

**OFFICIAL ENTRY BLANK** send to: HOUSEPOWER, P.O. Box 1888, Grand Central Station, New York 17, N.Y.

IMPORTANT: Read "Quick Facts about HOUSEPOWER" before filling in entry.

(Place a check in the squares preceding each correct answer. Each question has one and only one correct answer.)

- Today, the number of existing homes that need additional wiring is  2 out of 5  3 out of 5  4 out of 5  1 out of 5.
- One cause of low HOUSEPOWER is  too little electricity available from the electric company  inadequate service entrance  too many fuses  excessive rainfall.
- Overloaded circuits may be responsible for  appliance motors burning out  fuses that never blow  dripping faucets  superior TV reception.
- A scarcity of outlets can be safely corrected only by  using "Octopus" outlets (2- and 3-way plugs) and extension cords  rearranging your furniture properly  plugging into lighting outlets  putting in additional circuits and outlets.
- Bringing your home up to full HOUSEPOWER  requires a license for use of high voltage  increases the value of your home  generally takes two or three weeks  brings discomfort to home occupants.
- The person best qualified to discuss your wiring problem is  your pharmacist  your electrician, or electrical contractor  the neighborhood handyman  your insurance broker.
