New Tobacco Contracts Next Week Committees To Meet In Each Town; Asked To Sign

The new 1936-39 tobacco contracts will be ready for the signatures of the producers during the week of September 15-25. Each 1934-35 contract signer will be mailed a copy of the new contract, with his base acres and pounds thereon, and with a letter notifying him of the place, date and time to meet the committee for signing the new contracts. It will be necessary for the contractor to bring the copy of the new contract, which will be mailed to him, when he meets the committee.

One day will be allotted to each township in the county, and all contract signers are especially urged to sign on the day designated. A landowner, if he wishes, can have the contract signed by a cash tenant, share-cropper or any person designated by him to sign the contract, and can have all payments made to himself, thereby relieving him of all signing, except receipts for checks. Contracts may be canceled or transferred to other persons at the beginning of each year, and all payments under the contract can be made to the landowner, in case a contract is signed by any person other than the landowner. These provisions are for anyone living at a great distance, or who for one reason or another is unable to go to and from Kenansville at different times for signing necessary papers in connection with the contract.

The time and place for signing the contracts in the different townships is as follows:
Wed., Sept. 18th, Gilson, Scott's Store, 9:00 A. M.; Wed., Sept. 18th, Albertson, Holt's Store, 9:00 A. M.; Wed., Sept. 18th, Kenansville, A. Gant's office, 9:00 A. M.; Thurs., Sept. 19th, Smith, Freely Smith's Store, 9:00 A. M.; Thurs., Sept. 19th, Limestone, I. J. Sandlin's Store, Beulaville, 9:00 A. M.; Fri., Sept. 20th, Cypress Creek, E. G. Gant's office, 9:00 A. M.; Fri., Sept. 20th, Island Creek, "Bud" (J. F.) Bradshaw's Store, 9:00 A. M.; Mon., Sept. 23rd, Rockfish, Mrs. A. Mc. Herring, 9:00 A. M.; Mon., Sept. 23rd, Rose Hill, High School Gym, Rose Hill, 9:00 A. M.; Tues., Sept. 24th, Warsaw, National Bank Building, 9:00 A. M.; Tues., Sept. 24th, Magnolia, Health's Store Building, 9:00 A. M.; Wed., Sept. 25th, Faison, Town Hall, 9:00 A. M.; Wed., Sept. 25th, Wolfscrape, Voting Precinct, 9:00 A. M.

All tobacco contract signers are warned to bring their allotment cards to the Agent's office immediately upon the completion of the sale of their tobacco, and sign the marketing card, which is an application for benefit payments.

All tobacco contract signers are again warned to check the allotment card figures immediately after each sale at the warehouse.

The return of the allotment card and the correctness of the figures thereon, will determine the time of the benefit payments.

High Waters Damage Goshen Bridges

High waters in Goshen Swamp has caused washouts at the crossings between Summerlin's Cross roads and Kenansville and between Friendship and Stanford. Some passing was made over these bridges over the week end, but it was considered dangerous and traffic was advised to use other roads. Highway men will make the repairs as soon as the water will permit. These washouts are caused by water washing under the fill at the edge of the bridges undermining the road at the approach to the bridge and causing it to cave. Goshen is full of water from the recent rains.

Dr. Graham Calls For Larger Agricultural Research Program

Tells Mass Meeting of Farmers at Willard Agricultural Research, Which Pays for Itself Many Times Over, Has Never Been Adequately Supported in State Cities Values.

Willard, N. C., Sept. 12.—President Frank P. Graham of the University of North Carolina, speaking at a mass meeting of farmers at the State Coastal Experiment Station at Willard this (Thursday) morning, emphasized the need in the state for a larger agricultural research program.

"Agricultural research, never adequately supported in this state, has suffered heavily during the depression," he said. "There has never been a direct state appropriation to the research work of the central agricultural experiment station. Dr. Graham pointed out that the indirect support of the Central Station through the fertilizer tax was reduced over sixty per cent. "For a state, so basically agricultural as North Carolina," he said, "such a policy is economically and socially suicidal in its long run effects upon rural life in our state."

Declaring that the agricultural research in North Carolina has paid for itself many times over, Dr. Graham said that a larger investment in agricultural research would be "economic and social wisdom on the part of a people responsive to what they owe the farmers today and all the people of tomorrow."

"Agricultural research can improve the breeding and feeding of plants and animals, makes war on plant diseases and pests, discovers new plants and new values of old plants, emphasizes the need of crop diversification and rotation, calls attention to the economic and social values of rural electrification and agricultural cooperation in production, credit, and marketing, and provides the factual basis for the needed alarm at the economic and social dangers of an increasing farm tenancy and a lopsided economic structure heavily loaded against agriculture."
