PULPWOOD

**a good business
to STAY in!**

Many people around here started cutting pulpwood during the war as a patriotic measure. They also found it was good business.

We believe pulpwood production will continue to be a good business in peace-time as in war-time for both full-time and part-time producers.

It is a business with no conversion problem. There are shortages of all kinds of civilian needs that will keep the industry going at top speed

for a long time to come. And beyond that are a lot of new industrial uses for pulpwood developed during the war.

Every indication points to continued high demand and good prices for pulpwood.
