DWELLINGS

In the aggregate, there has been quite a bit of building activity here during the past few months—repairs, alterations, re-building, enlargements, etc., of business structures.

UNTIL

When we think of the havoc wrought by war in Germany and Japan, we feel kinda sorry for the masses of the people in those countries; but when we read, again and again, of the horrible brutalities practiced by the warring forces of those lands against their prisoners of war—well, our sympathy dandles very sharply.

VALLEY OF LEAST RESISTANCE

The mountain brooklet did not dig gullies in a day—it took hundreds of years. The paths of the rivers winding toward the sea were made in the valley of least resistance. Socialism is paving the way for ultimate control via social "liberal" legislation supported by quasi-socialist-democrats (and Republicans) who don't seem to care along which road they are leading us, as long as it is the highway marked "political expedience."

Oboe Radar Guided Pilot to Target

Even Told Him Just When To Drop His Bombs.

AN RAF BOMBER BASE, ENGLAND. — The British air ministry has made known the workings of a highly effective form of radar called "oboe," which led bombers to targets in Germany on beams sent out from ground stations in England, and even told bombardiers when to release bombs.

These stations, it was disclosed, were able to "watch" planes along the entire route, in fog, storm, or darkness, and were a major factor in blasting Hitler's war plants. If the Krupp armament works at Essen was the target, a radar beam 17 feet wide would be aimed at the city from a ground station near Dover. That is believed to be one reason for so much German cross-channel shelling of Dover. The beam would hit Essen right over the Krupp works, just like an imaginary wire rope hanging in the sky.

Bombers would take off and make a beeline for Essen. Wherever they intercepted the beam, automatic signals would start flashing and coded dots and dashes begin coming over the earphones. All a pilot had to do was turn squarely onto the beam and follow it to the target. When he reached a certain point, so many seconds from the assigned target, he received a coded "release bombs" signal from the ground operator back in England.

When the pilot returned he could see his bomb run recorded in black and white on a graph made by an electrical instrument similar to weather graphing machines. Airmen say "oboe" gives them virtually automatic accuracy to within eight yards of the smallest target.

American 8th and 9th air forces adopted much of the RAF radar technique and developed some new methods of their own. The Germans had a radar system but always lagged behind the Allies in new developments, and were never able to solve the mystery of how to counteract it for defensive purposes.

Asks to Allow Atomic Rocket Service to Moon CHICAGO. — R. L. Farnsworth asked the government, to grant him the first civilian permit to put atomic energy to peacetime use. He wants to develop a solar transportation system providing regular eight-hour flights to the moon.

Mr. Farnsworth, president of the U. S. Rocket society, wrote a letter to the research council on national security at Washington asking for permission to use atomic energy to make a rocket in which earth dwellers could travel through the universe at a rate of seven miles per second.

"The discovery of atomic power means that rocketeers who have been shooting at the moon can raise their sights to the planets beyond," he said, in an interview. "It means that some day there will be a regular rocket service to the moon and other planets."

"I want to see a solar transportation system that would make the man in the moon our next-door neighbor."

Visualizing the moon as the Chicago of the universe — a shuttle station for rocket service to points beyond — Mr. Farnsworth said atomic power can solve most of the problems that have vexed his fellow rocketeers.

His principal difficulty, he said, would be in harnessing atomic power.

Plans for \$200,000,000 Hospitals' Growth Given WASHINGTON, D. C. — Plans for a \$200,000,000 hospital construction program to meet all anticipated veterans' requirements were made public recently by the veterans' administration. The two-year program is now before the federal board of hospitalization for approval. It calls for building 40 new hospitals and for additions to many existing institutions.

Officials said that if the plans were endorsed by the board and funds were appropriated by congress, the administration would have hospitals with a total bed capacity of 300,000 at the end of the 1947 fiscal year. "We believe that will be enough for all our needs," one official said.

The bed capacity of present veterans' hospitals and those which are under construction or authorized, is 123,931. The new program would add approximately 29,000 beds.

The remaining hospitals necessary to bring the total capacity to the 300,000 bed mark are expected to be transferred to the administration by the army and navy as their own needs diminish.

Magnesium Is Smelted Direct Under New Method WASHINGTON. — Magnesium, the light metal that has revolutionized airplane construction since the beginning of the war, can be smelted directly out of magnesium-silicate ores by a new process. U. S. Patent No. 2,379,876 has just been issued here to Dr. Fritz J. Hansgirg.

Dr. Hansgirg is at present carrying on his magnesium research at Black Mountain college, in North Carolina.

NOW IS TIME TO ORDER FERTILIZER

Assistant Agriculture Commissioner D. S. Coltrane recently advised North Carolina farmers to place orders as soon as possible for the fertilizer they will need next spring. "Every farmer who has a dry place in which fertilizer can be stored should put in his order now and have it shipped as soon as convenient," said Coltrane. He declared that fertilizer manufacturers have about the same amount of materials this season as last year, but they are still handicapped by labor shortages and transportation difficulties. If the anticipated heavy demand for fertilizer is to be met by planting time, there must be an orderly movement of fertilizer from the factory to the farm, according to Coltrane. "The farmer who orders his fertilizer early and gets it under

his own roof will not only be helping himself, he will be helping some farmer who lacks storage space," said Coltrane.

IS GETTING UP NIGHTS GETTING YOU DOWN?

Thousands say famous doctor's discovery gives blessed relief from irritation of the bladder caused by excess acidity in the urine. Why suffer needlessly from backache, run-down feeling from excess acidity in the urine? Just try DR. KILMER'S SWAMP ROOT, the renowned herbal medicine. SWAMP ROOT acts fast on the kidneys to promote the flow of urine and relieve troublesome excess acidity. Originally created by a practicing physician, Dr. Kilmer's is a carefully blended combination of 18 herbs, roots, vegetables, balsams. Absolutely nothing harsh or habit-forming in this pure, scientific preparation. Just send ingredients that quickly act on the kidneys to increase the flow and rid you of the uncomfortable symptoms of acidous irritation. Send for free, prepaid sample TODAY! 1. The thousands of others you'll be glad that you did. Send name and address to Department B, Kilmer & Co., Inc., Box 1100, Bristol, Conn. Offer limited. Send no money. All orders will be filled.
