DEATH came to Lt. Dale Christensen, Gray, Iowa, 112th Cavalry, after heroic action at New Guinea, which earned him a medal of honor. Finding his platoon badly shot up from short range fire, Lt. Christensen crawled close to the enemy, silenced one machine gun with hand grenades and later led an assault which resulted in the destruction of four mortars and ten machine guns. Our investment in War Bonds encourages such men to offer the supreme sacrifice for freedom for all humanity.

N. Outlaw. The meeting adjourned until December.

SERVING AMERICA'S NEW FRONTIER

The South Welcomes Them.

THE postwar readjustment period will bring new blood to the South. Many young men from other sections who received their training in southern camps will return and make their permanent homes in the South. They have discovered the South. They were charmed by the South's congenial climate and the quiet, easy manners of its people. They saw with their own eyes fertile lands that will produce a variety of year-round crops. They saw in the pasture lands, which provide green grazing two-thirds of the year, wonderful dairying possibilities. They were impressed by the fact that egg production and poultry raising are at the peak in midwinter when these products on the farm are at the lowest ebb in the other climates.

golden harvest from the egg and poultry industry, is 3,000 miles from the big markets of the east, while the average distance from the South to these markets is less than a thousand miles. Quick transportation will put fresh vegetables on eastern dinner tables 24 hours after the vegetables are gathered.

Every acre of fertile land in the South is an inexhaustible diamond mine, but the diamonds are in the form of rich sub-soils which will produce a variety of crops twelve months in the year.

Today the South is the brightest and most promising section of the nation. In an economic sense, the South has turned its face away from the past and is viewing the future with hope and confidence.

The South will welcome these young men who have the vision to recognize and appreciate its possibilities. ***
