Price Control Pioneers

Post-war inflation is nothing new, it was really serious in the days of the American Revolution. George Washington minced no words in speaking of inflation. Our first President saw sugar go from 28 cents a pound to \$12.50 and flour go up to \$2,000 a barrel.

"A wagon load of money will scarcely purchase a wagon load of provisions," Washington wrote to John Jay. "Unless that most

infamous practice of raising prices of the necessities of life can be stopped, it will be impossible for any funds to subsidize the Army." Washington was also quoted as saying, "I believe it is essential to fix the prices and if persons will not comply, the great law of self-preservation must authorize us to compel them."
