## LEGISLATIVE SUMMARY

SPECIAL!

Low Prices

In spite of the considerable nount of time spent on the suppleental pay bill for the balance of the current fiscal year (as one observer put it, "finishing the work of the 1945 legislature"), the work of the 1947 session seems to be moving along at a better-than-average rate of speed. Many of the r administration and departntal bills are already in the mill and under consideration by appropriate committees, and so far the s have been making good progress. Judging from the num- have a greater number of differ-

ber of bills introduced, this session is ahead of the 1945 session for a comparable period of time: at the end of the 21st legislative day, 80 bills had been introduced in the Senate and 201 in the House for a total of 281, as against 78 bills in the Senate and 136 in the House for a total of 234 for the same per-

iod in 1945 - a little better than a

20% increase in speed.

The apparently greater speed with which the General Assembly is going about its work does not necessarily mean, of course, that this session will be shorter than the last, nor that it may not even that a greater number of bills have been introduced thus far may mean that the members of this Assembly

ent legislative ideas to present for consideration, that the total number of bills will be greater than before, and that consequently more time will be required to consider them. As for the work of the committees on the major pieces of legislation, the really controversial issues have not yet reached the open controversial stage. There are troversial matters to be disposed of before adjournment sine die can be pronounced.

Bills pertaining to schools and school teachers were much in evidence during the past week. The House and Senate received on the same day separate versions of a school building fund. HB 118 would set aside \$11,000,000 from the General Fund as a "Special Building to publish it: Fund" to be allocated to the varbe a great deal longer. The fact lous counties as grants-in-aid for school plant construction and improvement, the amount of the grant to be determined on the basis of the Calypso, N. C. value of property locally assessed per child on average daily men bership in the schools. SB 55 would set up an initial fund of \$10,000,-000; which would be increased by \$15,000,000 out of any General Fund surplus of the next biennium. to be distributed to the various countles for school plant improvement on the basis of need. HB 163 would provide that school bus drivers must be at least 21 years of age, while HB 164 would limit the salary of school bus drivers to \$60 per month. And finally came HB 194 embodying the "South Piedmont Plan" for teachers' pay: ranging from \$1560 to \$3,000 per year (9 months) for holders of "A" certificates, and from \$2,000 \$3,600 per year for holders of 'Graduate" certificates.

Among other bills was SB which would increase the punish ment for drunken driving (a second conviction would bring a manda-tory minimum punishment of 90 days imprisonment and \$200 fine); SB 67 would require the confinement of dogs during the months of April, May and June (the breeding season of rabbits, quail and other wild game).

To round out the week, HB 5 was ratified so that towns of less than 20,000 population may now install parking meters, and HB 148

introduced on Wednesday, would make the second Wed August of each year a new holle which would be known as Farmers Day."

### Calypso Merchant open controversial stage. There are many important and highly controversial matters to be disposed of School P. T. A.

School Committeeman Hervey Kornegay recently addressed the Calypso Colored School PTA. The following letter was written to him and the Times was requested

Calypso Colored Sch Calypso, N. C. Jan. 30, 1947

Mr. Hervey Kornegay Dear Mr. Kornegay:-

Words are inadequate to expres our appreciation for your presence at our PTA meeting and delivering such an inspiring and wonderful address. We have acknowledged results and response from the pa-rents through the inspiration they received from it.

Regardless to the qualifications of any man no one could excel your address. We didn't know that our school Committeeman was a pre acher and orator as well as a business man.

We would like to relate to you how some of the proceeds we received during the collections were used. The President of the PTA

It was pointed out by SKF Industries, Inc., that it now uses approximately 48,000 pounds of cobs annually to burnish and clean ball.

DAINATE AND TEMPLES

Keen outside buying interests in the poultry producing section kept prices on the firm side with most 1-6 pound chickens bringing 20 to 25 cents. Fryer prices moved up three to five cents. Arrivals of nearby produced eggs at most markets brought a weakness in prices.

Fine-cured tobacco markets last Friday, and Old Belt mar tets also were winding up sales Virginia fire-cured prices averaged some lower and sun-cured averag-ed slightly higher.
