

Kenansville Society and Personals

NOTICE!

The Kenansville Woman's Club will meet next Thursday, June 26 at 3:30 P. M. in the club rooms. Mrs. F. W. McGowan will be in charge of the program on Fine Arts. The public is cordially invited to attend.

Girl Scouts Hold Meet

The Kenansville Girl Scouts held their regular meeting last Wednesday at the scout house by the Spring. Mrs. Hallie Daughtry was the leader in the absence of the regular leader, Mrs. N. B. Boney. After a short business session, outdoor games were enjoyed.

Missionary Society

The Woman's Missionary Society met on Monday afternoon in the Baptist Church, with the vice-president, Mrs. C. B. Sitterton presiding. The program on the "American Negro" was presented by Mrs. Sitterton. The Heck-Jones Memorial Services were observed by the society, conducted by Mrs. E. V. Vestal.

Bridge Club Meets

Mrs. J. O. Stokes entertained the members of the Monday Evening Bridge Club on Tuesday evening with Mesdames I. C. Burch and Jack Sitterton as additional guests. Summer flowers were used for decoration. At the conclusion of play Mrs. V. B. Gavin was awarded high score for club members and Mrs. I. C. Burch for visitors. They were both awarded Cara Nome toilet water. The hostess served delicious

pear salad, date bread sandwiches and iced tea.

Personals

Mr. and Mrs. Murphy Canady and Hezekiah Dobson recently visited in Kenansville.

Mr. and Mrs. A. W. Taylor spent Saturday night at their home here. Mr. Taylor is attending summer school at Chapel Hill and Mrs. Taylor is spending the summer with her mother in Lillington.

Mrs. Percy Blanton spent last week at Ridgcrest.

Miss Frances Jean Patterson spent Sunday at Carolina Beach. Dr. Heath moved to Chincupin last week where he will practice medicine.

Mrs. Gordon Kornegay recently underwent an operation at James Walker Hospital in Wilmington. Reports are that she is improving nicely.

Mrs. Davis Farrior is taking a few days vacation this week.

Mrs. Floyd Allred and son Tommy of Siler City visited Mrs. R. W. Burgess from Tuesday through Friday of last week. Mrs. Burgess accompanied them home for a week's visit.

Miss Erma Williams is on vacation this week. She is visiting Mr. and Mrs. H. J. Casebolt in Charleston, S. C.

Mr. and Mrs. Willie Davis of Mt. Olive spent Sunday with Mr. and Mrs. Dan Davis. While here they all motored to Onslow County.

Mrs. Robert Hollingsworth recently underwent an operation at Memorial General Hospital in Kinston. She is reported to be getting along nicely.

Master Eccles Pridgen, Jr., of Norfolk is spending the week with Miss Rebecca Grady.

Miss Janet Boney attended the Youths Conference which was held at Flora Macdonald College from June 10 to 16.

The E. C. Tyndalls are spending the week at Kures Beach. Miss

Mary Sue Burch and Miss Janet Boney will visit them while they are there.

Mr. and Mrs. James A. Dobson of Snow Hill spent Sunday with Mr. and Mrs. P. J. Dobson. They were accompanied home by their daughter Linda, who had spent the week with her grandparents.

Jimmie Jerritt of Duke University and N. B. Boney, Jr., of Chapel Hill spent the week end at home with their parents.

Mrs. Leo Jackson spent Tuesday in Kinston. While there she visited Mrs. Robert Hollingsworth, a patient at Memorial General Hospital. Emory Sadler, Jr., visited in Seven Springs during the week.

Miss Pattie Sue Southerland left Sunday for Greensboro where she has accepted a secretarial position. Lawrence Southerland, Jr., Bobby Ingram, and Guy Gooding, Jr., are spending the week at Camp Tuscarora.

Rev. and Mrs. J. G. Morrison are helping with the Bible School at Hallsville. Miss Dianne Stokes is spending several weeks in Atlanta, Ga., with her aunt.

Mrs. C. E. Stevens underwent an operation at James Walker Memorial Hospital on Saturday. Reports are that she is improving very satisfactorily.

Mrs. E. V. Vestal and children Roy Lee and Brinson and Mrs. Rivenbark made a business trip to Kinston Tuesday morning.

Kontract Klub Met Wed. Eve.

Mrs. Vance Gavin was hostess on Wednesday evening to the members of the Kenansville Kontract Klub and an additional table honoring Mrs. Robertson of Mt. Pleasant, S. C. Arrangements of white gladioli and petunias were used for decorations. When scores were totaled, Mrs. J. B. Wallace was awarded high score for club members and Miss Mary Lee Sykes for visitors. They were both awarded candy.

Mrs. Robertson was given a lovely handkerchief. The hostess served a tempting sweet course and iced tea.

This is No Gag!

Bob Burn's farm at Canoga Park is no mere invention of the famous Screen and Radio wit's imagination. In spite of his many fibes on his weekly Radio programs, Bazooka Ranch is a well known Berkshire breeding establishment. This sale entry found its new home in Durbin, North Dakota, and Bob and neighboring Berkshireman A. H. Simons load it at the Ranch to start the 2,000 mile trip. No, Bob's Uncle Slug never raised famous hogs like this back at Van Buren.

Local P. C. A. Attends Convention

Eugene D. Carlton, president of the Kenansville Production Credit Association, and Arthur Kennedy, Fred Outlaw, and M. W. Sutton, who comprise four of the board of directors of the former cooperative credit association, have returned from a state-wide conference of directors held at Wrightsville Beach, N. C.

According to Mr. Carlton, the conference was devoted to a discussion of farm finance considerations; our economic situation as it affects North Carolina agriculture; ways and means of improving credit service; and providing constructive credit services to farmer-members during the post-war period.

Garland P. King, Secretary-Treasurer, also attended the conference and he said, "The group gave much thought to strengthening membership relations and plans for further progress in achieving complete member ownership of the

association." Speakers appearing on the program included: Julian H. Scarborough, President of the Production Credit Corporation of Columbia, S. C., Dr. G. W. Forster, Head, Agricultural Economics, N. C. State College, Raleigh, and Dr. L. D. Baver, Dean and Director, N. C. State College of Agriculture.

Church Bulletin

The preaching schedule for the Duplin Methodist Circuit is as follows: Magnolia, 11:00 o'clock A. M. Unity, 3:30 o'clock P. M.

The pastor, Rev. John M. Cline, will preach at both of these services.

A Vacation Bible School will begin at Wesley church Monday, June 23 at 5 o'clock p. m. Rev. Joe Petree will be the director of this school. All boys and girls between the ages of 4 and 12 are urged to attend.

Beginning at 8 o'clock, June 23 a Youth Activities Week will be held at Wesley. These activities

will also be under the direction of Rev. Petree.

Paul Walker Returns To Base

Sgt. Paul Walker has returned

to his base for reassignment following a terminal leave from Post McCall, Wis., which he spent with his parents Mr. and Mrs. George B. Walker of the B. F. Grady section. Sgt. is with an Infantry Division and prior to his Wisconsin assignment he served overseas in the Pacific Theatre for 18 months.

Choose the CURE-ALL SYSTEM for its heavy duty oil heaters tried by time and thousands of users since the year 1930

Users of CURE-ALL TOBACCO SYSTEMS Say

I have used a Cure-All for 7 years with less than \$3.00 repair and I have yet to see the system that will equal it in performance.

Q. G. Vaughn, Ahoskie, N. C.

After using a Cure-All 4 years without any trouble, I am fully convinced there is none better on the market. I would not depart from the Cure-All system for many times its cost.

L. S. Godwin, Union, N. C.

I purchased a Cure-All System and cured six barns—one each week until the last barn. It operated perfectly and we were able to reach any temperature desired. We used as little as 60 gallons of No. 2 fuel oil on some barns and lost scarcely any sleep at all. This feeling of security against fire hazard is worth a lot. The quality of my tobacco was greatly improved and brought fancy prices on the auction floor. In summing up all good features of your system and the results we got from the cures, we say that it is the most satisfactory method of curing tobacco.

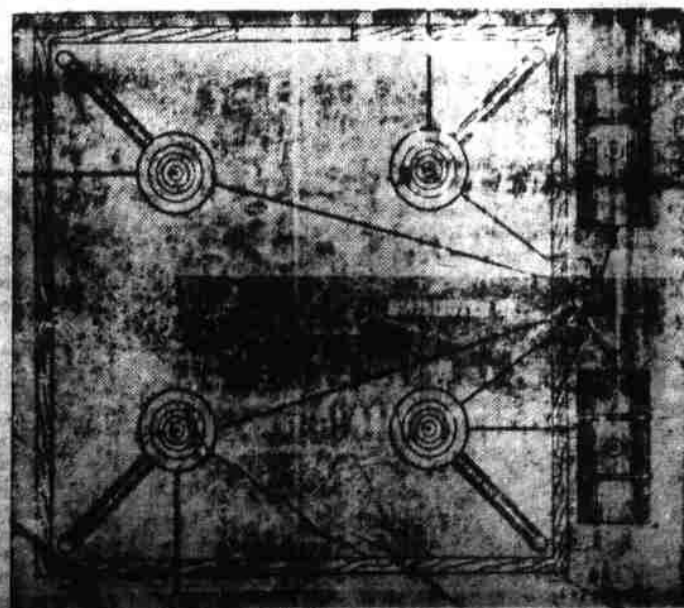

H. D. Wagoner, Cycle, N. C.

Last year I installed a Makomb Cure-All System in my log tobacco barn, 16 ft. square, seven tiers high. It was very economical, using from 65 to 90 gallons No. 2 oil to the curing (depending on amount of tobacco in the barn), a cost of 1 1/4 cents per stick for fuel. The Cure-All System provided uniform temperature throughout the entire barn. The outside controls make sufficient heat easily available to reach any desired temperature. After curing, one of the units was used in my incubator building, and I shall use another one for curing potatoes. It is, no doubt, the most complete and perfected curing system that I ever had the pleasure of seeing.

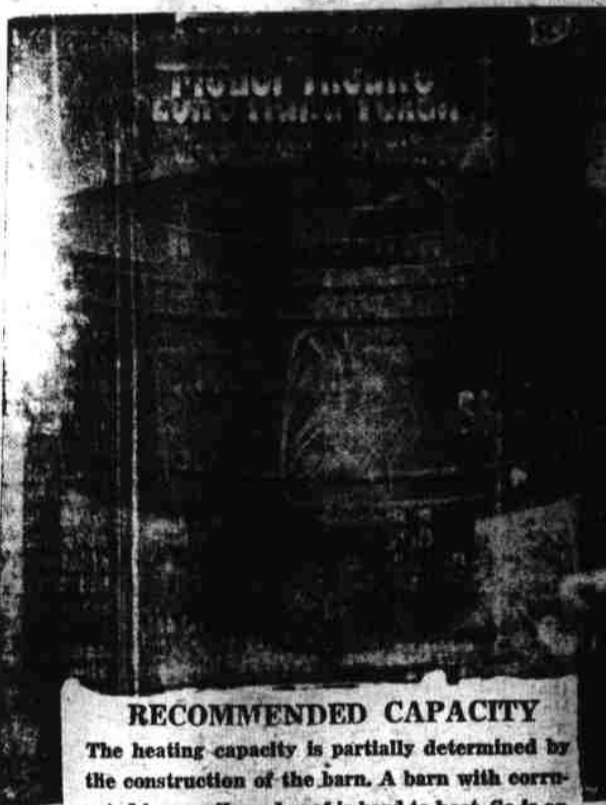

W. T. Modlin, Ahoskie, N. C.

CURE-ALL INSTALLATION LAYOUT

The layout of the Cure-All System with its four giant heaters in curing a barn 16X16. The two oil drums and the Control Units are placed outside the barn on the same side of the building.

- Full 30 inches in diameter
- Full 28 inches high overall
- Patented Twin Blast Burner
- Heavy 18 and 22 gauge steel
- Easy to light
- Outside cleaner
- No wicks
- Built to give many years of service

RECOMMENDED CAPACITY
 The heating capacity is partially determined by the construction of the barn. A barn with corrugated iron walls and roof is hard to heat. So is an old log barn with its chinking in bad need of re-

pair. Even a good log barn with a corrugated steel roof could be greatly improved by lining the roof with insulating board. The top of the barn runs very hot and a single thickness of steel roof wastes heat rapidly.

We recommend one Cure-All System of 4 heaters for any well built barn in good repair and not over 16' X 16' square, or, with not over 260 sq. feet of floor area.

For larger barns add one or two heaters. While four improved Cure-Alls will deliver enough heat for a 20 foot square barn, the use of five or six heaters will result in better heat distribution, the fuel expense will be lower, the cure better and the depreciation of the heaters reduced. We do not guarantee to replace free any part or parts which burn out prematurely unless these recommendations are followed.

T. A. TURNER & CO.

PINK HILL, NORTH CAROLINA

- Built for you by heating equipment specialists, to do a better job in your barns.
- Featuring —
- Even Curing
- Easy Control
- No Open Flame
- Less Fire Hazard
- No Wood To Cut
- No Fires To Tend
- Low First Cost

DOUBLE DRUM HEATER

No curing system can be better than its heaters. No system has heaters comparable to the four giants supplied with a Cure-All system. The Cure-All heater is super-efficient. It really gets heat out of the oil into the room. Even curing is promoted by even distribution of heat. Here you have a powerful heater you can depend on. Time has proven it to be right in every detail. It is a real furnace-like heater that gets furnace results.

PATENTED TWIN BLAST BURNER

The Twin Blast Burner needs no priming, has no wicks, lights from a bit of rag or paper. The Twin Blast Burner is built different, works different, needs no complicated air controls. Used in Marine Corps Ovens. Years of use and continual engineering development have perfected the smallest detail. As the flow of oil increases the flame burns higher, the intake of air automatically increases to secure clean complete combustion. To clean it, just turn the patented Easy Cleaner Handle outside the heater.

OUR GUARANTEE

The Globe American Corporation has a national reputation for quality heating equipment. When you choose a Cure-All system you take advantage of our specialized experience as leading manufacturers of Oil Burning Equipment—breeders, tank heaters, space heaters. We guarantee to replace free of charge any defective part or parts returned to us within 90 days after purchase.

PERFECT CONTROL UNITS

Depend on these for sure, constant oil flow. They are precision built, highest quality devices, almost identical with those we use on our famous Safeway Oil Heater for the home. Each has a big, built-in trainer, a pressure equalizing float mechanism, and two hand regulated oil flow control valves with dials. A safety overflow is provided to protect against float failure. Set to pass a minimum per heater of 1 1/4 gallons, and a maximum of 18 gallons in 24 hours. You simply open or close the valves to increase or reduce the heat.

The Control is mounted on a steel wall bracket or shelf, and has a round steel cover which may be secured with a padlock. The oil line from tank to control and from control to heaters is 1/2 inch copper tubing.
