## Mrs. Smith Tells Of PTA Plans

Mrs. Madeline E. Smith, president of the Warsaw Parent-Teachers Association has outlined the policy of the PTA for the coming year. She says that emphasis this year will be placed on improving the school grounds, helping to provide better recreational facilities for the youth of the community, improving equipment for classroom teaching, better health thru cooperation with health agencies; a greater appreciation of art and music, and safety measures to protect children from accidents.

Mrs. Smith says that the PTA will strive to live up to its principles to bring the home, school and public into closer relationship so that may cooperate and develop a united effort to secure every child the highest advantages in physical, mental, social and spiritual education. It will stand back of every effort to promote laws for the care and protection of children.

## Birth and Death

Mr. and Mrs. George Johnson, of Warsaw, announce the birth and death of a son, George Orr, on Sunday, August 17. Mrs. Johnson is

**A Public Relations Job**  
 America's biggest public relations assignment, perhaps the most significant of this kind in the history of the world, is gaining momentum. It's off to a good start. You may call it industrial statesmanship, if you want to, or you may call it selling the American way of life. What it amounts to is an all-out effort on the part of each one of us to demonstrate the faith we have in our economic system. So doing, we shall weather any present or future crisis.

There must be no tongue-in-cheek when we assert that never has any other system given a people so much; nor has any other system a brighter future. We Americans are not generally an emotional people. We can read history without weeping. Europeans think of us as more "practical" and less idealistic. At any rate, we have been so busy that we have largely overlooked our selling job, until time is later than we thought.

**Selling Ourselves**  
 An industrialist recently indulged in a bit of analysis: "The simple fact that our American-style processes of finance, production, distribution and selling actually produce more for more people than does any other set of processes ever devised by man, has never been planted deeply in the minds of our people—at least not to the extent that it becomes an ever present and active part of the public consciousness."

I am afraid this is too true. If we had actually sold ourselves on America through the years, we would never have seen the phenomenon of certain of our public figures playing peek-a-boo with the Communists. There would be genuine appreciation of the accomplishments and potentialities of America in every university chair in the land.

**Campaign of Truth**  
 Against so many rampant, fanatical destroyers, a clean and constant campaign of truth, well organized and supported, can be effective. Against the doubters and the cynics, this great public relations program must be tied-in with all-out effort to produce goods for the American people, through an economy of abundance. Without good works, your theory falls flat. Only first understand the system, if you please, then it's easier to make it work.

Too many somehow have decided that business, in this "capitalistic" country, is altogether bad. These folks have not considered, however, how many cherished things they would have to give up if they got rid of "capitalism." Without private initiative in business and industry, in labor, and in professional life, we would sink to the level of some of our critics.

We take a lot of things for granted. Yet we have a job to do. If we are businessmen, let us not only sell the product we make, but let us sell the product as a symbol of the freedom under which it is made. If we are workmen, let us consider our jobs as by-products of the freedom under which we live. And no matter what we are, let us know that this is our best chance of

the former Miss Sue Griffin Deham, of Warsaw.
