Use Care In Handling Imflammable Insecticides

> Great care should be taken when using inflammable insecticides to spray barns, corn cribs, etc.

> Carbon bisulfide of "high life" is one of the most dangerous sprava more dangerous than gasoline and can be ignited from the heat of a steam pipe.

If imflammable insecticides and fumigants must be used they should never be kept inside of a building housing persons or animals, and never should anyone try to strike a match within ten feet of a building which is being sprayed or fumigated.

s. fal ld res

It Has H ppened There Most of us thought it would never happen. But it has. According to the Associated P ess, the House of Commons on August 8 approved a bill giving the British government authority to tell its people where they must work and what they must This means that the governdo. ment may order men and women whatever job it pleases: coal ing, farming, fishing, anything. ver, it means the government choose the place where any man or woman must work. This is a drastic step. Why is individual freedom thus destroyed by a country with such a long rec ord of high devotion to the individual citizen and to freedom? The answer is simple. Two years ago a socialistic government embarked upon a campaign for government management of leading industries in

Mr. Aubrey Smith, son of Mr. and Mrs. Alvin Smith, who has been in the Navy, has received his. discharge and is now at home. He expects to go to Washington, D. C., soon where he will marry Miss Betty Williams in that city. The couple will reside there and Mr.

KINSTON, N. C.

TUN

like that

war, that the people permitted this. Orisis Upon Crisis The socialistic government relie upon nationwide sympathy and co-operation. However, this lasted only a few weeks. Then as ab-senteeism set in and productivity lagged, the whole system bogged down. The crisis came last winter, when a terrible coal famine came to that country with plenty of coal under - ground: Under socialism crisis thrives on crisis, and there were more to come. In these crises, it is easy for men to accept disaster, if they think it will prevent more disaster. This is what has happened. In

England. Things were in such a bad way, because of weakness from

an apparent final resort to keep government management of in 503 from becoming a complete failure the British are taking this more drastie step. Yes, in peace-time one of the greatest liberty-loving countries in the history of the work has given its government at My to draft labor, and to tell each an and woman where to work and what to do.

Let's Have Free Despite their great love of liberty, the British people have now found that loss of individual freedom fol-lows adoption of a government man-aged economy, just as night follows day. It leads to this every time. It is and to see this great country, the advert the see the great country the like others that have accepted the blandishments of socialism, willing by give up the freedoms for which her people have shed blood through the centuries.

A considerable num people are evidently inspired by for-tign ideologies, and some are ask-ng for government control of Amercan industry. This step England now taking is a real warning to all American workers that with there must surely come gos there must surely come gov-ent dictation to workers. The kers, in the face of constant risis, are told where to work and to do

Seeing that these things very direction toward a totalitariment, our people should their minds now that t want government manup their minds n not want governme
