Types of Benefits Payable By SSA

The Social Security Administration today urged all retired workers and survivors of deceased wage earners to file claims promptly so that benefits would not be lost. A claim for benefits must be filed before payment can be made. A worker or his family may be eligible for benefits if the worker has had a job in private industry long enough to build up an insured standing. Monthly retirement benefits are payable to an insured wage earner when he is 65 or older and stops work; to his wife when she is 6; and to his unmarried dependent children under 18. Monthly benefits may be payable to certain survivors of insured workers no matter at what age the worker dies, to his unmarried widow at age 65; to his widow of any age caring for a child entitled to benefits if she has not remarried; and to dependent parents at age 65 when neither widow nor child survive who might become entitled. A single payment can be made when an insured person leaves no survivor immediately eligible for monthly payments at the time of his death. This lump sum payment may go to the widow or widower who was living with the deceased wage earner at the time of his or her death or, if the worker is not survived by any such relative, to any person who paid the burial expenses. An amendment to the Social Security Act in 1946 entitles survivors

Center Street Comes Of Age

At night, 21 years ago, Goldsboro citizens tore up from Center street the tracks used by three railroads. The tracks never were put back there. Instead, as you know, there is room for four rows of free parking spaces. Room is still left for the equal of two streets, with traffic each way. (The 3 railroads which now use the Union Station - and advertise in the daily Goldsboro News-Argus - are the Coast Line, Southern, and A. and E. C.)

A little care saves a lot of wear! A Spring change from contaminated, old winter oil to Nth Motor Oil protects from grit and dust that can ruin the inside as well as the outside finish of your car! Conoco Nth Motor Oil (Patented)* contains a special added ingredient that fastens an extra film of lubricant so closely to metal that metal surfaces are actually OIL-PLATED! This OIL-PLATING stays up on cylinder walls while you're running hot and when you're not... won't all drain down into the crankcase even overnight! That's why Nth Oil extra-protects from "dry-friction" starts... from sludge and carbon caused by wear. So, for extra-cool, extra-powerful, extra low-cost miles... Make a date to OIL-PLATE!
