Miss Elnora Rouse And C. C. Ivey, Jr. Wed In Dobson Chapel Church

Miss Elnora Rouse, daughter of Mr. and Mrs. L. H. Rouse, of the Dobson Chapel Community, became the bride of Charles Cresson Ivey, Jr., son of Mr. and Mrs. C. C. Ivey, Sr., of the Summerlin Crossroads Community, in a candlelight ceremony in the Dobson Chapel church at 5:30 o'clock on February 19. The Rev. N. E. Gresham officiated at the double ring rites. Wedding music was presented throughout the ceremony by Mrs. Louise Mitchell. Mrs. Walter Stroud sang "Sweetest Story Ever Told" and "Because". Vows were spoken before an altar of long leaf pine, interspersed with candelabras holding white bridal tapers. Large Tiffany baskets of white gladioli and snap dragons were used on either side of the altar.

The bride, given in marriage by her father, wore a white gabardine suit with navy accessories. She wore a string of pearls, a gift from the groom, and a purple lip white orchid.

Maid of honor was Miss Polly Rouse, sister of the bride, who wore a baby blue gabardine suit with white accessories and a corsage of white carnations.

After the ceremony the couple left for a tour through western North Carolina and upon their return will be at home at Summerlin Crossroads.

Cake Cutting

Cakes, nuts, and punch were served to the wedding party and friends. The home was attractively arrayed with yellow jonquils, iris, and fern. HOME OWNERS' QUESTION BOX

Q—Does a porch cost as much to build as a room of equal size?
A—An open porch costs approximately half as much. A screened porch costs about two-thirds as much. A glassed-in porch costs about the same.
Q—Why is sheathing applied diagonally on the sides of a house?
A—It has been found that diagonal sheathing is eight times as strong as horizontal sheathing.
Q—In relation to home building, what does "parge" mean?
A—Parge is coarse plaster used as a decoration or as protection for masonry. Sometimes it is called "parge coat."
Q—What is the modular system of construction?
A—It is a system of planning all measurements in multiples of 4 inches. By facilitating extensive use of standard size materials, the modular system minimizes cutting of materials on the job and lessens waste.
Q—Why does paint blister on the exterior of a house?
A—If the house was painted recently, within a year or two, moisture under the paint is probably the reason. If there is moisture between the wood and the paint, the sun's heat can raise vapor pressure, resulting in blisters which crack so that the paint peels off.
