HOW TO SHOOT A RIFLE

By ARTHUR E. COOK
National and Olympic Rifle Champion

Sighting

Gun sights are used to point the rifle at the target and it is important to learn to sight perfectly. An error of 1/10 inch in sight alignment will place the bullet two inches from the center of a target only 50 feet away—a bad miss.

If you have the rear peep and front post sight combination on your rifle, aim as shown at top left, centering the top of the post in the peep hole. With an open rear sight (right above) center the top of the post on a level with the top of the rear sight before directing the aim on the target. Notice that when shooting at bullseye targets you aim at the bottom of the bull rather than at the center. That is because you are likely to lose sight of the black post within the black bullseye.

Aiming and shooting at bullseye targets is not only a great sport with many thousands of adherents throughout the world, but it is also the finest training for any kind of shooting. If you can't hit a bullseye that is standing still how can you expect to hit a live target that is moving?

(This instruction based on the book, "HOW TO SHOOT A RIFLE," published by The National Rifle Association, Washington, D. C.)

WHITE HOUSE AID

WASHINGTON, D. C.—Frank K. Sanderson, chairman of the White House employees' division for the Red Cross fund drive, gets early delivery of campaign materials from Red Cross motor service driver.

Do's and Don'ts to Help You Keep Blinds Shining

At least a list of do's and don'ts for Venetian Blinds! And you can be sure it's a valid list because it has been issued by the Venetian Blind Association of America.

The Association recommends that you treat your blinds as you do your furniture. Dust them as often as you dust your home. A five-minute session with an ostrich feather duster will keep them looking as new all year through. Dust away from the tapes.

Once a month or so wipe the blinds down with one of the standard cleaners such as glycerine or ammonia or good old soap and water. If you're gadget-minded, there are several blind cleaning devices on the market and the standard cleaners will keep your Venetian Blinds bright.

If you want your blinds refinished, repaired or given a good face-lifting, check with the firm from whom you originally ordered the blinds.

And here are the don'ts: Never use wax on wood blinds! No matter how sparingly you use it, the wax makes repainting and refinishing of blinds impossible. Paint will not adhere to a waxed surface.

Never douse your blinds in a bathtub! Tapes may shrink or fade and a careless, undried water spots may mar the beauty of your blinds, be they wood or otherwise. After all, you don't dunk your other furniture in the bathtub... and blinds are furniture.

Never expose your blinds to rain, hail, sleet and snow. The raging elements can ruin the paint finish unless you are certain to wipe them dry as soon as possible.

Never allow your blinds to become so dusty or soot-covered

UPKEEP It's easy if you follow the simple do's and don'ts on how to keep your Venetian Blinds looking like new. Proper care means a saving, too, because it will add to the life of the blinds. Note the new summer idea of daisies twining up and across the tapes in the picture above. That an ammonia cleaner will not restore them to their original color. Like any other furniture, the more care you give your blinds the more years they will last.

Home Management Specialist in County

Mrs. Marjorie S. Doshier, Home Management Specialist with the Farmers Home Administration spent Thursday and Friday last week in Duplin County. Mrs. Doshier worked with Mr. and Mrs. Cecil Westbrook of Rt. 1 Seven Springs on plans for the arrangement of storage space and of electrical outlets as well selection of equipment for the interior of their new home near B. F. Grady School.

Mrs. Doshier met with the FHA committee and the supervisor on Friday and discussed her work in the county. Her headquarters are in Fayetteville and she works in 17 counties.

Baseball May Come To Warsaw This Season

It is reported that Warsaw may get into professional baseball again this year. Last season it lost its franchise in the Tobacco State League. According to reports the owner of the Dunn-Erwin club may offer to transfer his club to Warsaw for the 1949 season. It is reported that attendance in Warsaw last season. Definite arrangements have not been completed but reports say the club will move to Warsaw on condition that the fans pay the club \$1000 and a small rental fee for the ball park.

4. Top dress with 100 lb nitrogen fertilizer for each 10 bushels you wish to increase your yield above what the acre of land normally makes.

5. Cultivate shallow and lay by when corn is about 30 inches high. Arrangements are made to get 400 lb of 20-20 nitrogen to use on contestants' contest acre. Only a limited amount is available so you should enroll at once.

FROM FARM AGENT'S OFFICE

196 corn growers have entered the Duplin Corn Production Contest, sponsored by the Warsaw Jaycees. Attractive cash and merchandise prizes are offered the winners. Any person may enter contest by furnishing name and address to their County Agent before planting their corn. A person may take one acre and see how much he can produce. In addition to the prizes offered, attractive 100 bushel corn club member certificates will be

awarded by State College to those producing 100 bushels or more per acre. Each grower producing 100 bushels or more automatically becomes a member of the N. C. 100 bushel corn club. There are no rules or regulations to follow, however, here are a few suggestions we believe will help increase corn yields:

1. Plant an adapted Hybrid;
2. Apply from 500 to 600 lb of some good general crop fertilizer;
3. Space your corn 12 inches in 3 1/2 ft. rows;
