Have you ever been riding a bicycle and take hold of a slow moving vehicle and let the vehicle do your pedaling for you? It is easy going for you but it calls for more gas from the fuel tank of the vehicle that tows you along.

The above is the same in the American Legion. That is why all veterans of the World should not be coasters, because the present membership in the American Legion are having to do your pedaling for you to keep you moving along in order that you can enjoy the rights and privileges as veterans made possible to you by the world's largest veterans organization — The American Legion.

Let's all join up and work together for our rights and privileges so justly belonging to all veterans.

OPEN FORUM

Look magazine has just published an exposition entitled "Needed: 1,000,000 Teachers", by John Guy Fowlkes, dean of Education at the University of Wisconsin. This article is important.

Nearly 45 percent of all children born in the U. S. between 1931 and 1948 were born during the last six years of that period. Starting next fall there will be an increase in enrollment of a million children a year. By 1956 about 26,394,000 children will be enrolled in elementary schools.

Teachers have been leaving their profession at an alarming rate. 143,000 new elementary teachers are needed to fill present vacancies. 306,000 new teachers are needed to take care of the bumper crop.

"And to replace the teachers who will leave their classrooms permanently during the next ten years," Dean Fowlkes expounded. "We'll need 560,000."

Within the next ten years a million teachers will be needed in the elementary schools alone!

In September we will have only 13,500 new elementary teachers; less than a tenth enough. Why this acute shortage? Miss Mildred Odle, English teacher, said, "Teaching is fast becoming a thing of mass production. I had 180 students this year. Exactly three mothers were sufficiently interested to inquire of their children's well-being."

Miss Ada Jamieson, science teacher, said, "Parents most often need the education."

The causes of this crisis are not those we usually consider alien to our responsibility. Parental irresponsibility is the major cause.

What can we do? We can begin—and continue—our children's training at home and not depend upon the teachers to do our jobs in addition to theirs.

That is our charge. It should be our pleasure.
