## P. T. A. To Meet Tuesday Night

The Warsaw PTA will hold its meeting Tuesday night at 7:30 in the high school auditorium. At this meeting we are to hear from one of our Duplin County Health Nurses who will explain the nature of the Duplin County Health Program and how its work is carried out.

The PTA is interested in having a tonsil clinic for the benefit of the Warsaw school children. Health is a primary factor in keeping up our school attendance and the more familiar parents become with the functions of the health department the more we will be able to cooperate with the doctors and nurses in this work.

It is up to the parents to come out Tuesday night and show an interest in not only the health of our children but also in our neighbor's children.

**Membership Drive** - This week Oct. 11th through 18th the PTA membership drive is on. All members are urged to make this drive a success. In some communities the PTA membership represents 100% of the school. After Tuesday, Oct. 18 the room having having the most memberships subscribed over 75% of its enrollment will have a half holiday. The winners will be announced Tuesday night at the meeting. The committee sponsoring this project is composed of Mesdames George Penny, Stacy Britt, Fred Baars, and Edna McLamb.

**Halloween Carnival** - The PTA will have its annual Halloween Carnival Friday night, Oct. 28 at 7:00 o'clock in the high school gym. Following the regular program a Talent Show will be presented in the auditorium by the Junior Class. Make plans to attend.

## State College Answers Timely Farm Questions

Q. How can I get rid of fowl pox in my laying flock?  
A. All unaffected birds should be isolated and vaccinated with

pigeon pox vaccine. Individual treatment of tincture of iodine or carbolated vaseline to the affected portions is beneficial.

Q. What practice is recommended to protect hogs from swine flu?  
A. Get rid of old straw stacks and other unsanitary matter around the hog yard. Keep hog houses well ventilated. Protect animals from undue exposure to cold and dampness and prevent piling at night.

Also it is a good idea to check the animals for lung worm as these parasites are connected with the spread of swine flu.

## N. C. Kids Would Get Break In Ideal School

North Carolina kids will be exposed to the three 'R's' in an atmosphere of healthfulness, color and efficiency if educators have their way in planning schools of tomorrow.

North Carolina's hypothetical ideal school would be a one-story brick building of "functional design" strictly modern containing 14 classrooms and such special service rooms as an auditorium, cafeteria, and music room, costing about the sum of \$28,214. For pupils' health and welfare the building would be centrally heated and ventilated; by thermostatically controlled equipment; fluorescent lighting; asphalt-tile floors; and would use colored chalkboards instead of the conventional blackboards.

## Senator Graham Will Support Anderson Bill

Senator Graham said today that there are now two bills before the Congress: The Gore Bill and the Anderson Bill, and that he would support the Anderson Bill.

The Gore Bill is a one-year stop-gap bill and continues the present agricultural policy and continues the old 1909 to 1914 base period for the calculation of parity. The Anderson Bill uses the same base period, but also takes into account the price relationship of the most recent ten-year period. Two world wars, a world depression, mechanization of agriculture, and other factors have made the old basis 35 years out of date.

The Anderson Bill also has a provision that wages of farm labor are to be a factor in the calculation of the parity formula. The Chapman amendment, in the interest of Burley tobacco growers has been accepted by Senator Anderson as a part of the Anderson Bill.
