A total eclipse of the moon on Thursday evening of last week was visible throughout its entirety to people of Duplin county. Scattered clouds in the sky at no time were over the face of the moon.

Beginning around 7 p.m. the earth's shadow completely covered the moon by 9:20 and the eclipse continued until about midnight.

The ruddy appearance caused by reflected sun's rays which usually appears on the face of the moon during total eclipse was absent.

A total eclipse of the moon can only take place at full moon since at that time it is exactly opposite the earth from the sun.
