LIVE — and LET LIVE

North Carolina is a good place to live and that is why we so strongly believe in the "let live" theory.

Essentially we are a people capable of and determined to self-regulate our local affairs without benefit of outside influence or remote control.

A good example of state-wide self-regulation in North Carolina is found in the Malt Beverage Division of the State Board of Alcoholic Control, which is cooperating with the legitimate retailers selling beer, to keep all such establishments clean, orderly and operating according to law.

This system is working, but prohibition wherever tried has been a failure.

Uncle Sam Says

Your "Uncle Sam" is proud to join in saluting our youngest business men — the newspaperboys. These young men, 500,000 of them, are demonstrating the principal requirements for success — ambition, initiative, enterprise, industry and thrift. In addition to giving invaluable aid to peacetime Savings Bonds Drives, they are also investing their earnings in U. S. Savings Bonds. "NOW LET'S ALL BUY BONDS."

2 ways TO PLOW AN ACRE

3 1/2 HOURS ON AN EASY SEAT

OR 12 MILES OF TOUGH WALKING

Any field or plot big enough to grow a crop is big enough to be handled from the comfortable seat of a Model G Tractor. Plows of all types — mold-board or disc, one-way or two-way — mount in front under the open tool arch.

The tractor provides the power, controls the tool, and gives you a place to ride. You have walking-plow vision and close-quarter convenience... with no tugging, straining or lifting. If your operation is big enough for any kind of power, it's big enough for Model G tools-in-front, rear-engine power. Let us demonstrate.
