An Open Letter to Our Customers

DEAR FRIEND:

Johnson Cotton Company has served your needs for a good many years.

We believe you would like to make your family happy this Christmas with the labor saving devices we are offering in this list. We have many more.

Why is this so important to you now. Because all manufacturers have been severely cut by the Government for defense requirements in the use of metals. We have representative stocks of quality products—many bought before recent price increases—but the definite fact is: Goods made of metal are becoming more difficult to obtain and the prices are continually rising.

So—we ask you to make possible a real holiday for your family lasting for years while we can offer you this fine merchandise now. Replace or put in new equipment while it is available. Come in and see us for terms and let us show you how easy you can buy.
