

# Chinquapin Chats

BY: VIDA MILLOY

The Red Cross quota for this vicinity was generously adhered to with willing hearts and thin pocketbooks but it will do the same good where it goes we hope. A true sense of the need of our Red Cross was experienced by our own reporter, who in a disaster many years ago, lost a son and had two others of her family in a hospital at once and their family aid ran in the thousands before they were released. Typical of thousands of cases, thought this reminder would make a donator feel better.

Mr. Jack Batts and son of Washington, D.C. were down during the holidays visiting their parents Mr. and Mrs. Bert Batts. Mrs. Clyde Batts enjoyed the anticipation of a trip to Fla. but minutes before she started -- bang -- her trip was canceled . . . why? Son Robert is expecting to go see Uncle Sam!

Who says life begins at 40? Well, it may not begin at 40, but it certainly doesn't stop there either. A dead person couldn't think up the activities in the new play "The Whirlpool," which is waiting to set the date to be presented in the Chinquapin High School in a week or so. Nothing less than a genius could tear your heart out with words as Mrs. Milloy Arthur has done in this make-believe of a family of people. Watch for the date of "Whirlpool" to be announced soon. See for yourself.

Mrs. Leslie Lanier who was miraculously saved from a tragic death in a gasoline explosion a few weeks ago is now out again and able to look after her household, but it will be some time before she can use her hands as usual. Her face is hardly scarred at all. How lucky!

## FARM AGENT'S NEWS NOTES

By LACY WEEKS

### Permanent Pasture

A recent survey in Duplin County shows that on many of the permanent pastures where Ladino Clover stands looks doubtful a few weeks ago the clover is now beginning to show up. Young clover plants are coming up where no clover could be seen a month ago. Severe cold during the winter slowed down the germination and growth of pastures a great deal. A number of farmers who were considering re-seeding their pastures about the middle of February are now finding that they have good stands of young clover. It is recommended that young pasture be given every advantage. Examine closely to see if a stand of clover is present before any attempt is made to re-seed. Pastures should be allowed to grow 6-8 inches before stocking. If pastures are given time to get well established it will mean much more grazing for livestock in the future.

### Treating Cotton Seed

One of the important steps in producing a successful cotton crop is treating the seed. Every bushel of cotton seed should be properly treated. This operation may be done any time prior to planting. Proper seed treatment will reduce seed, caused by a rotting organism which attacks seed before it germinates; reduces soil shrinkage; reduces angular leaf spot caused by fungus on the seed or blown on by the wind; reduces Anthonomus boll rot sometimes called pink rot -- most severe where rains occur during season.

Cotton seed may be treated with new improved Ceresan 1 1/2 oz. per bushel for fuzzy seed; 3-4 oz. per bushel delinted seed or 2% Ceresan 3 oz. per bu. Fuzzy seed; 1/2 oz. per bu. delinted seed, or Dow 9-B, 1 1/2 oz. per bu. Fuzzy seed; and 1 oz. per bu. delinted seed.

### State College Answers Timely Farm Questions

Q. How can I prevent bloat among my cattle?

A. Feed hay or silage before placing animals on legume pastures. Dry roughage irritates the stomach walls and causes belching, which is the natural way of expelling gases. Graze animals on grass pastures for a few hours before placing them on rich legume pasture.

Cottonseed hulls treated with molasses are recommended. Molasses increases the palatability and increases consumption to the point where the hulls are helpful.

Avoid turning hungry cattle on legumes in the pre-bloom stage. Feed other feeds to take the edge off their appetites and keep them well-filled.

Q. How can strawberry spider mites be controlled?

A. Use DN-D4 dust when the temperature is below 80 degrees. In warmer weather this material

Another reason for care of machinery suggested the farm agent, is that replacement parts may become difficult to obtain as increasing amounts of metal are diverted to the defense effort. The wise farmer, he added, will attempt to make present equipment last as long as possible.

Defective hitches, seats, clutches, wheels, brakes, steering mechanism, and unguarded revolving parts are things to check. The National Safety Council has reported many fatal accidents caused by failure of makeshift seats and unguarded power takeoff shafts on tractors. All dirt, trash, and grease should be removed from platforms

## Mother of Two Praises Hadacol

HADACOL Supplies Deficient Systems With Vitamins B<sub>1</sub>, B<sub>2</sub>, Niacin and Iron

Mrs. Elmer Hisel, 3225 2nd Ave., Council Bluffs, Iowa, is a good mother and like all good mothers she keeps a careful watch for the welfare of her two young children. And when little four-year-old Lucille Hisel wasn't feeling as her mother should

Lucille Hisel she decided to do something about it. Mrs. Hisel gave Lucille HADACOL because she had heard how much it was helping children who had poor appetites and stomach distress caused by deficiencies of Vitamins B<sub>1</sub>, B<sub>2</sub>, Iron and Niacin. It helped her so much that now Mrs. Hisel gives HADACOL to both of her children.

Here is what Mrs. Hisel says: "My daughter has taken two bottles of HADACOL and she has been eating more before and also sleeps better. I think HADACOL is the best thing for children who do not have an appetite. My daughter is four years old. Before taking HADACOL, my daughter complained of her stomach hurting her and I got her a bottle of HADACOL and she says, 'I feel better now.' HADACOL is wonderful. I will also give HADACOL to my three-year-old daughter."

HADACOL is so delicious. An interesting new product, HADACOL is a concentrated liquid supplement that gives you vitamins B<sub>1</sub>, B<sub>2</sub>, Niacin and Iron. It is easily absorbed and digested. The natural flavors of HADACOL make it a welcome addition to any meal.

MISS JULIA POWERS is the daughter of Dr. and Mrs. John Frank Power of Wallace, who announce her engagement to Robert George Sandrock, son of Mr. and Mrs. William H. Sandrock of Wind Gap, Pa.

pedals, foot rests, and steps to assure safe footing. Sulphur dust is recommended at temperatures from 70 to 90 degrees. Be sure dust reaches under side of foliage.
