## Miss Godbold Gives Shower

A surprise shower was given Wednesday night by Lois Godbold of Warsaw. The party honoree was Miss Helen Brown, who will become the bride of John Anderson Johnson on June 2nd.

Mixed spring flowers were used in the living room. The hostess presented Miss Brown with a file of the guest favorite recipes.

After several games the hostess served sandwiches and punch.

## Thursday P. M. Club Meets

On Thursday afternoon Mrs. Norman Barr was club hostess at a session of bridge at her home on College street. Potted plants were used to decorate the living and dining rooms where the game was held.

High score prize, a plastic table cloth went to Mrs. Helen Benton and a demitasse cup and saucer, for traveling prize, went to Mrs. George Clark.

During the game the guest enjoyed coco coles and chee-wees. For refreshments, Mrs. Brown served Heavenly hash and toasted pound cake.

Playing were Messmes. Clark, Benton, J. A. Newkirk, Layton Alberston, Robert Lewis, Milford Quinn, Yancey Smith, and the hostess.

Mr. Lloyd Rouse spent Sunday in Watauga.

Mr. and Mrs. Elvin Boyette spent Monday p. m. with Mr. and Mrs. Lloyd Rouse.

Mrs. Elvin Boyette and children spent Sunday in Selma.

## Bride-Elect Honored At Two Parties

### SUPPER PARTY

Mrs. James Middleton and Mrs. L. S. Whittle entertained at a supper party Tuesday night honoring Miss Helen Brown, bride-elect of June.

Mrs. Whittle's home was very attractive by candlelight. Red and yellow roses were used in the living room where canasta was later played.

Mrs. William Getis of Dunn won a double deck of cards for high score and note sheets went to Mrs. George Sutton of Mt. Olive, for low score. The honoree was remembered with kitchen utensils.

Those enjoying the evening were Misses Agnes Turnage, Lola Godbold, Virginia Easley, and Myra Butler of Rose Hill, Alta Lawson, Kenansville, Mesdames Getis, Sutton, Jerry Johnson, Plastope, Eldon Brown, Rose Hill, Mrs. Glenn Brown, Allen Draughan, Jr., Joe Suratt, Jr., John Fornale, Billy Bartlett, John Vinson, and the honoree.

### COCA COLA PARTY

Mrs. Jerry Johnson and Mrs. Marvin C. Johnson of near Rose Hill gave a Coca Cola party Saturday afternoon at 4 o'clock honoring Miss Helen Brown, bride-elect of Watauga and Magnolia.

Mixed bouquets of spring flowers were used in the living and dining rooms. An attractive arrangement of red colas and greenery were used in the center of the dining room table which was covered with a lovely green argandy cloth.

Upon arrival Miss Brown was presented a corsage of carnations. A corsage of roses was given Mrs. Mr. and Mrs. Ed. Newton from

Tracy Brown, mother of the bride elect, and also to Mrs. Rivers D. Johnson, mother of the prospective groom.

Dairy party sandwiches and colas were enjoyed by the guests. The honoree was presented a set of coasters.

## Birth Announced

Mr. and Mrs. Richard Riggs announced the birth of a daughter on Saturday May 12 at Clinton hospital, in Clinton.

## Boyetties Have Family Gathering

Mr. and Mrs. John A. Boyette, Jr., of Warsaw, celebrated Mother's day at their home Sunday. All the children were present, Mr. and Mrs. J. B. Boyette and family of the community, Mrs. Floyd Rouse of Seven Springs, Mr. Elvin Brown, Rose Hill, Mrs. Glenn Brown, Allen Draughan, Jr., Joe Suratt, Jr., John Fornale, Billy Bartlett, John Vinson, and the honoree.

Mr. and Mrs. J. L. Outlaw and baby of Raleigh and Mr. and Mrs. Rudolph Hawley of Wilson spent Saturday night and Sunday with their mother, Mrs. Katie Outlaw.

Mr. and Mrs. Jeff Horton and daughter of Zebulon spent Saturday night and Sunday with Mr. and

Daughter of the family, specialists suggest that it is poor economy to send a badly soiled suit or trousers out to be pressed. Cleaning costs only a little more and takes out soil before pressing. Best of all for saving clothes and money is giving clothes the daily care that keeps them clean as long as possible and holds them in shape.

**FREE FITTING** Fitting is the biggest problem in dressmaking for most women, clothing specialists tell us. Only if it fits will a homemade dress pay full returns on the money spent for materials and the time and effort of making.

For the many women who will be starting their spring sewing soon and need to know how to get a good fit as well as how to cut and construct a dress, homemakers may wish to write for two bulletins — "Pattern Alteration" (F.B. 1968) and "Making a Dress at Home" (F.B. 1954). Address requests to: Office of Information, U. S. Department of Agriculture, Washington 25, D. C.

For a darning that doesn't show, here are some tips:

If possible, use ravelings from a leftover scrap of the fabric or from seam or hem. Lengthwise yarns are best for lengthwise darning; crosswise yarns for crosswise darning. Imitate the weave of the material. Sink the needle into the yarn of the fabric, leaving cut ends on the wrong side.

Lacking yarn from the same fabric, darn with dull thread of about the same thickness and appearance but slightly darker. Use as fine a needle as possible and short thread to avoid stretching the hole by pulling thread back and forth.

Several hens should be checked.

If lice are present, use either sodium fluoride or a roost paint. A second treatment should be made in 10 days to kill the nits that hatch out.

The treatment for mites is different. The red mites hide around the roosting places during the day and suck blood from the birds at night. A cheap but effective treatment is made with equal parts of used motor oil and kerosene. This mixture is applied to the perch poles and nearby places that may harbor the red mites. Carbolicum will give a more lasting effect than motor oil.

Answer: Warm spring weather usually causes an increase in infestation by lice and mites. A heavy infestation can lower egg production. The pests may also spread to the brooder house and cause unthrifty chicks.

Question: What can I do to control lice and mites among my chickens?

Answer: Warm spring weather usually causes an increase in infestation by lice and mites. A heavy infestation can lower egg production. The pests may also spread to the brooder house and cause unthrifty chicks.

Question: I have a few apple trees in the back yard but can't take the trouble to spray them as a commercial grower would. What do you suggest?

Answer: The following recommendations are made for apple growers who wish fair results but can't bother with the expense or trouble of obtaining and using several different materials. Apply one ounce of Fermate plus one ounce of lead arsenite in three gallons of water. Apply this spray when the center buds first show pink, just before bloom, when most petals have dropped. 10 days after petals fall, then about every two weeks until four more applications have been made.

Work under a good light and on the right side of the fabric so that you can see the effect as you work. Take tiny stitches. Keep the darn flat. Stitches that are too tight will pucker, too loose will puff. When finished, steam-press on the wrong side, then brush up lightly on the right side to lift the nap.

**23 States Accept 4-H Public Speaking Program For 1951**

Filling our form 941 (quarterly return form filed with Bureau of Internal Revenue) will be easier if the farmer keeps some kind of record which gives him the following information: names and social security numbers of regular hired farm workers, length of time worked, and total amount of cash wages paid each during a calendar quarter.

## Farmers Told Keep Records

The 4-H public speaking program — now in its second year — promises to become very popular with club members in North Carolina. Realizing that the ability to project thoughts and ideas clearly is of prime importance in leadership, citizenship and everyday life — they are earnestly taking part in the program, in order to train corners and make their best better. Twenty-three states have accepted the program for 1951, as compared with 19 last year.

Gold-filled medals are awarded to the boy and girl winners in each participating county. State winners' awards comprise a handsome set of silverware for the top-ranking girl, and a 17-jewel wrist watch for the outstanding boy. Winners are determined not only on what they say, but how well they say it. All awards are provided by the Pure Oil Company.

William Pressly of Iredell county, was last year's watch winner in North Carolina. Daisy Simpson of Mecklenburg county, received the silverware award for her outstanding work. County medals were awarded to 17 4-H'ers in the State.

This program is conducted under the supervision of the Cooperative Extension Service.

## PRESTON HOLMES Questions And Answers

QUESTION: What row spacing is recommended for bunch type peanuts?

ANSWER: Tests conducted by the North Carolina Experiment Station show that close row spacing can increase bunch type peanut yields as much as 600 to 1200 pounds and bring additional profits of \$75 to \$100 per acre. In Edgecombe County in 1947, a yield increase of 1,000 pounds was obtained when row width was reduced from 36 to 18 inches. Similar results have been obtained in other tests. Use of 18-inch rows also increases hay yields by about one ton per acre.

QUESTION: How can I keep my pigs free of lice?

ANSWER: Spray them with creosote oil, DDT, or benzene hexachloride. However, benzene hexachloride should not be used if the animals are to be marketed or slaughtered within 30 days. For information on how to grow swine profitably, get a copy of Extension Folder No. 83, "Profits with a Broad Sow and Big Program." See your county agent or write the Agricultural Editor, State College Station, Raleigh.

QUESTION: How large will the national sweet potato crop be this year?

ANSWER: Indications are that the 1951 crop will be the smallest since 1940. It will be about 443,900 acres, compared with 572,900 last year and a 10-year average of 671,900. North Carolina's 1951 crop is estimated at 50,000 acres, compared with 59,000 last year.

Question: What kind of records am I required to keep in connection with payment of social security taxes for farm workers?

Answer: W. L. Turner, extension farm management specialist at State College, says the law doesn't specify the type of records to be kept. However, it does say that some kind of records must be kept and they must be available for inspection by the Bureau of Internal Revenue if necessary.

Question: What can I do to control lice and mites among my chickens?
