P. T. A. Organized

On August 28 a meeting was called by Mr. Grey, School Principal, of the parents and friends of the school. There were about fifty people present. Mr. Grey gave the purpose of the meeting to organize a P. T. A. and to get a lunch room. Officers were elected with Mrs. Ralph Bishop as president, Mrs. Bert Johnson, vice president and Mrs. Paul Tucker, secretary and treasurer.

Mr. Grey asked for a committee to work with him on getting equipment for the lunch room. The following were appointed: C. H. Pope, chairman; Mrs. Arsenius Johnson, co-chairman; Mrs. Sheiton Batts, Mr. Billie Taylor and Mr. Grey.

It is believed that the oil and coal ranges can be used for a while. The dishes and cooking utensils formerly used will be cleaned and hoped that the equipment will be made. Approximately \$125 was contributed for immediate use. It is hoped that the equipment will be ready by the time the official papers come from Raleigh. The application had been made before the meeting.

The first meeting of the P. T. A. will be held Monday night September 3rd, at 8 o'clock. Support our school program by coming to the meeting.

It's a funny thing, out people can't understand why other people move to Magnolia. Well, it seems that if anyone moves away they almost always want to come back. For instance, Mr and Mrs Roy Brown lived here a few years ago. They moved to Kenansville. Then last Friday they moved back here and are now living in James E. Jones house. They have three children, Donna, David and Jeffery. Well come back to Magnolia.

SPORTS AFIELD

Since the ax was one of the very first tools used by man, it has held a prominent place in mankind's customs. The ancient veneration for it has a faint modern counterpart in the care and respect shown an ax by the man who must use it frequently. He doesn't like to see anyone else use his axes, so the best thing is to buy your own and not borrow one for a camping trip. If you wonder what axe you should buy, here are suggestions from veteran outdoorsman Bill Wolf.

An ax should fit the job at hand. In a very broad sense, this means it should be as large as the user can conveniently handle. The person who has a fixed cabin or camp or has to do much timbering would

Use of radio instead of poles and wires for some parts of rural telephone systems is now to be tested on an experimental basis by the Rural Electrification Administration.

The so-called belt axes, hand axes or camping axes are miniature of the fore-going. They have a distinct place in the outdoor scene, but the camper who expects to do much shopping should not depend on one of them alone. They are
