## WD TRACTOR

### 3-Bottom Mounted Plow

Full plowing gives the WD and its new 3-bottom plow a chance to show what they can do. Let us prove to you that the WD will do the work of a much heavier tractor and that the new square-built plow is built to take it.

Two Allis-Chalmers features:

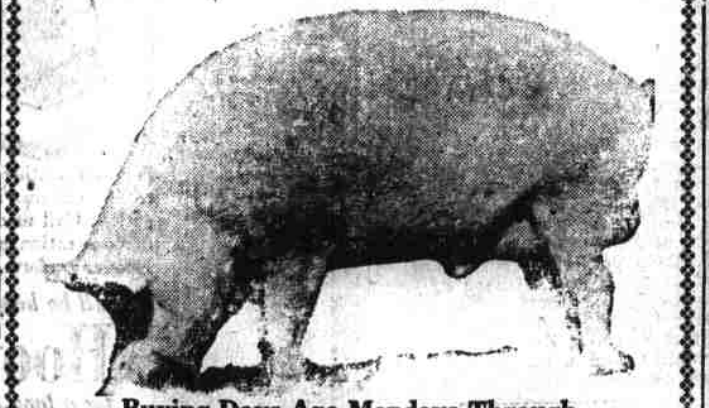

- 1. HYDRAULIC TRACTION BOOSTER** automatically puts extra weight on the WD rear wheels as the drawbar load increases. Takes off the extra weight as soon as you pass the tough spot.
- 2. THE PLOW IS FREE-SWINGING.** It follows contours and is free to dodge rocks. Short-coupled hitch gives quick penetration at the ends and mounts the plow bottoms close to the rear wheels for uniform depth control.

Let us prove it in your own fields.
