SHE'S THE SAFEST LADY ON THE ROAD

With Chrysler POWER RING plus Chrysler POWER BRAKES

At the wheel of a new Chrysler, you have quicker, surer control of motion than you've ever had in a car. You can't imagine what it's like till you drive it! With this full-time power steering, hydraulic power does 4/5 the steering work at your gentle pull on the wheel! You also turn the wheel 1/3 less distance. And on rough roads, soft shoulders, snow or sand, "wheel fight" just doesn't happen. Your hand actually has five times the usual steering control, through every minute of every mile... with the same sure "wheel feel" at all times!

With this safer way to steer, power brakes make stops at all speeds safer and easier, too. Power from the engine "boosts" every touch of your toe. Actually you stop with up to 2/3 less foot pressure than non-power brakes. You can bring your Chrysler to a halt from full speeds in many feet less distance than other cars of comparable size can stop. See your Chrysler dealer soon. Feel for yourself why thousands of owners say Chrysler offers the two greatest advances in many years in driving safety and driving ease!
