On Sunday the family of Mrs. L. J. Powell were together for the first time in fifteen years. There are eight children. Mrs. Powell lives with her daughter, Mrs. Laura Merritt in Magnolia.

ville Sunday afternoon. Allen Turner of Bryson City, N. C. brought his wife and little girl, Diane to visit her parents, Mr. and Mrs. J. H. Boyette in Clinton and more production is badly needed. Recent reports indicate that the acreage that farmers intend to plant in feed grain is about nine million acres short of the 1952 goal. All agricultural agencies are cooperating in a drive to help farmers reach the goals.

Farm operators in Duplin county who use supervised credit to develop efficient family-type farms are being asked to review their plans for the coming year and make every effort to plant all they had planned and to carry out recommended crop production practices. Home Administration office are the services of the local Farmers' Bureau.

Domestic requirements are increasing. Each day an additional 7,000 people—the equivalent of a good sized town—are added to our American population. We have 7,000 more mouths to feed today than we had yesterday—to say nothing of more bodies to clothe. Tomorrow there'll be another 7,000. In addition, our per capita food consumption is 13 per cent higher than the prewar average.

Another fact to be considered is that men in uniform eat more than civilians. In addition, the food needs of other nations that are directly in the path of communistic aggression must be met in part by the United States. High production also helps in the fight against inflation. The pressure on wages and prices is eased only when the supply of food and fiber is sufficient to meet the demand.

The Agricultural Mobilization

Unless farmers plant more feed grains than they did last year the country may face a serious shortage of livestock feed at a time when more production is badly needed. Recent reports indicate that the acreage that farmers intend to plant in feed grain is about nine million acres short of the 1952 goal. All agricultural agencies are cooperating in a drive to help farmers reach the goals.

Protect His FUTURE, Too! When your child falls ill, you are quick to call the best doctor you can get. Your child's health is precious to you—to be guarded at any cost! Equally close to your heart are your child's chances for happiness—achievement—success in his grown-up world of tomorrow. For him, you naturally want all the advantages that a first-class college education will give. So why not take a long look ahead and make sure that your dreams will come gloriously true? At surprisingly small cost per month, an endowment policy will give you this positive assurance: When your child is ready to go to college, the money will be there with which to send him. Let's talk it over. No obligation on your part, of course. A. L. CAVENAUGH PAUL POTTER, Associate Phone 424 Warsaw, N. C.

Here's what you've been waiting for! ...AND IT'S AS SIMPLE AS ABC The new Carolina Power & Light residential rates for the former Tide Water area went into effect April 1, 1952. They're money savers! Even better... the new rate GIVES you a block of electricity at NO EXTRA COST! That's right, you will be able to live better electrically and save! Rate A... If you use electric lights, a refrigerator, small appliances and your kilowatt-hour usage is less than 250 kilowatt-hours per month, you will come under this rate... BUT Your new bill will be figured in comparison with the amount of electricity you used last year... If you use more electricity this month than you used during the same month last year, your bill will be figured on rate B and you will find you have earned additional electricity at NO EXTRA COST! Under rate A 250 Kilowatt-hours will cost \$7.50 Rate B... If you have an all-electric home, or if by adding an electric range and other appliances your use increases to more than 250 kilowatt-hours, you are on rate B. The more electricity you use, the cheaper it gets. Under rate B 300 Kilowatt-hours will cost \$7.50 Here's where still more NO EXTRA COST electricity comes in. There's a special water heater rate figured in rate B. If you have an insulated standard storage type water heater of 30 gallons or more, you will find Under rate B 325 Kilowatt-hours will cost \$7.50 THIS ELECTRICAL LIVING GIVES YOU 75 FREE KILOWATT-HOURS OF ELECTRICITY! HELPING TO BUILD A Finer Carolina CAROLINA POWER & LIGHT COMPANY
