Woman's Club Holds Meeting Thursday

The Kenansville Women's Club met Thursday afternoon at the lodge building. Mrs. Ruby Newton, the president presided, and introduced the speaker, Mrs. Helen Cushman. Mrs. Cushman read as her text the Declaration of Independence, and urged all Americans to insist upon their freedom. She particularly stressed the danger of our losing our freedom of speech through negligence and carelessness, and pointed out how that freedom is restricted daily by censorship and government imposed regulations on methods of communication.

She concluded by reading from the Book of Americans by Stephen Benet.

Class Party Given By Miss Patsy Quinn

The rising ninth grade of Kenansville High School were entertained by one of their former grade parents at the home of Miss Patsy Quinn on the night of June 19.

Everyone enjoyed the varieties of games, square dancing, and Virginia Reel.

Due to work and vacations few of the large class of forty or more were able to attend. Those present were Barbara Mitchell, Marjorie Jones, Doris Jane Calson, Steven Monroe Williamson, Frances Brock, Richard Brock, Evelyn Bland, Kenneth West, Wilbert Kornegay, Edna Carol Barns, Betty Chambers and Carolyn Bostic.

The hostess served cold drinks and several varieties of cookies and candies.

Do You Know How To Walk? Watch These Ladies

Hollywood, June 22. A teacher of physical culture named today the women he thinks have the sexiest walk.

Walter Saxer, who's taught many of the Hollywood stars "body poetry" cited film star Anne Baxter for having "the grace of a great jungle cat. Helen Troy and Cleopatra must have moved in just this same way."

He says Mrs. Perle Mesta, U. S. minister to Luxembourg, "has a matronly figure, but she's highly skilled in the art of mobile grace. To watch her impeccable movements is to observe female grace at its elegant best."

Jennifer Jones has a "terrific sense of physical rhythm," he said. Queen Elizabeth, the queen-mother of England, has an exquisite carriage. Her physical motion is unsurpassed, he feels. She is never guilty of a gauche gesture or movement. Her hands move from the elbows and shoulders—never from the wrists.

Lady Sylvia Ashley has breathlessly beautiful body movements. Her walking steps remind Saxer of the dance steps of a ballerina.

Mrs. (Come up'n see me sometime) West has "overcome plumpness and certain physical shortcomings by an amazing drama of the body in action."

Saxer said her grace is not confined to hip movement alone. "Even her hands and shoulders enter into the provocative swing of things."

Saxer said Greta Garbo attended his physical culture classes at one time, but he admits she had nothing to learn. Greta was a born expert of body movement.

"There is something of the ethereal gazelle about Miss Garbo," he said thoughtfully.

Actress Vivien Leigh places as much importance on her body motions as she does the spoken word. "It's an emotional experience to watch her glide across a room as effortless as clear water in a brook," he said.

Delivers Sermon At Grove Church

The Rev. Fitzhugh T. Reid was exchange minister on Sunday at the Grove Presbyterian Church. Mr. Reid, whose home is in Warrington, is the pastor of the Kale, Waccamaw, and Ashwood Presbyterian Churches. Mr. Hayter delivered the sermon at the Waccamaw Church.

Mr. Reid read as his text from Matthew, and emphasized that we can get help, and accept it when it comes. "We must accept God as we understand him—he speaks to each of us differently. The first step, he said, is the hardest, our confession of need."

Double Protection Given by Selvage Asphalt Roll Roof

Nineteen-inch selvage, double coverage, asphalt roll roofing is the heaviest asphalt roll roofing manufactured for farm service buildings and other utilitarian structures. As indicated by the term "double coverage," it protects

all parts of a roof with at least two thicknesses of weather-tight material.

Like asphalt shingles, this type of roll roofing is surfaced with mineral granules. It is fire-resistant and is available in solid and blended colors.

A sheet of 19-inch selvage roofing is 36 inches wide. The mineral granules cover 17 inches of the width, leaving 19 inches unroofed. When the roofing is applied, the 19-inch unroofed portion is lapped completely by the next sheet put in place.

Roofs with a pitch as low as 1 inch of rise for each horizontal foot can be roofed with 19-inch selvage roofing. It is the only prepared asphalt roofing recommended for a roof pitch this low.

last week in Raleigh with Mrs. G. E. Jones and children.
