

Since the rains and cool weather have arrived we are having a great deal of trouble with plant diseases and insect pests.

Those of you who like to grow a fall crop of tomatoes will have to be on the alert. I have noticed heavy infection with leaf spot on some varieties. That will cause defoliation of the plants and of course loss of most of the crop. Also, at this time of the year, and especially in the mountain area,

we are troubled with late blight disease on tomatoes. Late blight will destroy the tomato fruits as well as the leaves.

For these diseases the plants should be kept covered with a good copper spray such as Tribasic Copper Sulfate or Copper A Compound. Use these sprays according to directions given on the container.

Another pest of tomatoes at this time of the year is the tobacco horn worm. Most tobacco growers know this pest very well. It will completely defoliate a tomato plant in a short time if not taken care of. In small gardens hand picking is the easiest remedy. In larger patches a spray of any of the stomach poisons will do the job.

The harlequin cabbage bug, sometimes called the terraphin bug, may give a lot of trouble with late cabbage, collards, mustard, and turnips. A 20 per cent Sabadilla dust, obtainable at most of the larger seed stores will control the harlequin bug effectively.

If your late sweet corn is being eaten up by bud worms, dust into the bud with a 5 per cent DDT dust. This dust applied to the silks as soon as they appear will effectively reduce the amount of ear worm damage also. At last two applications should be made.

See your county agent for N. C. Agricultural Extension bulletins on vegetable insect and disease control.

NOTICE OF ADMINISTRATION

Having this day qualified as executor under the Last Will and Testament of Shad Kornegay, now deceased, late of Duplin County,

Enrichment Of Corn Meal Helps Prevent Pellagra

A great deal is now being said about a corn meal enrichment program for North Carolina. Meetings have already been held in many counties so that millers, merchants and farmers could get together and discuss the merits of such a program. The people who attended these meetings are probably aware by now of what such a program would mean. But there are others who would like to know what it is all about.

We need an enrichment program in North Carolina because it will contribute to better health. State College Extension Nutritionist, Florence Cox says that one-third of the cereal foods eaten in the Tar Heel State are made from corn—and corn is lacking in several valuable minerals and vitamins. These additional vitamins will help to prevent pellagra, anemia and other nutritional deficiency diseases. The cost of enriching corn meal and grits is very low—only about three cents per bushel.

Fortunately for the homemakers, enriched corn meal looks like, tastes like, and cooks like any other meal. Most of you have your own pet recipes for pone, mush and dodgers, but here's a delicious recipe using enriched corn meal that you may not already know.

Apple And Sausage Cobbler

3 cups milk
1 and 1/2 teaspoons salt
1 pound link sausage
1/2 cup enriched corn meal
1 and 1/2 cups pared and chopped apples

water for boiling sausage
Scald milk in double boiler. Slowly add enriched corn meal and salt. Add chopped apples and cook for 15 minutes. Mixture may be cooked over direct heat five minutes but must be stirred constantly. Pour into nine-inch shallow casserole or baking dish.

Boil sausages in water five minutes, drain, and arrange on top of enriched corn meal mixture. Bake 20 minutes or until sausages are brown in hot oven (400 degrees F.). Serve with fried apple slices if desired. Serves six.

North Carolina, this is to notify all persons having claims against his said estate to present them to the said executrix on or before the 4th day of September, 1953 or this notice will be pleaded in bar of their recovery.

All persons indebted to said estate will please make immediate payment.

This 3rd day of September, 1952.

Negro Farmers Pleased With Arlington Oats

Nash County Negro farmers are well pleased with the yields and performance of their first crops of Arlington oats, according to W. F. Wright, Negro County Agent.

During the fall of 1951, twelve farmers seeded one or more acres of Arlington oats as a demonstration to prove locally the value of the new variety. A report of these demonstrations shows that three farmers cooperating harvested their crop for grain and nine farmers used the crop for hay.

Uiver Wiggins, Route 2, Middlesex seeded four acres of the oat variety and produced an average of 65 bushels per acre. Wiggins prepared a well-purified seedbed, applied 400 pounds of a 1-2-12 fertilizer per acre and drilled the grain in at the rate of two bushels per acre during the third week of October. The crop was top-dressed at the rate of 50 pounds of nitrogen per acre during the first week in March 1952.

Wiggins reported that the crop stood up very well and no trouble from any type of small grain disease was noticed.

The second highest yield was reported by Cary Moody, Route 2, Nashville who produced 60 bushels per acre and drilled the Arlington variety. Because of difficulty in getting the crop harvested on time, W. B. Battle, Route 1, Nashville, N. C. had a yield of only 25 bushels per acre. An average yield of 13 1/2 tons of hay per acre was reported by nine farmers who harvested their crops for roughage.

In order to determine the amount of nitrogen needed to produce the most economical increase in yield per acre of small grain, three farmers conducting Arlington oat demonstrations also completed top-dressing tests. In each case, three plots were top-dressed during the week ending March 1, at the rates of 40, sixty and 80 pounds of nitrogen per acre respectively.

The results follow: Wiggins, 40 pounds Nitrogen per acre plot produced 47 bushels of oats per acre; 60 pounds Nitrogen per acre plot produced 56 bushels per acre, and 80 pounds produced 85 bushels per acre. J. W. Whitehead, Rt. 2, Whitakers, 40 pounds yielded 42.5 bushels per acre; 60 pounds produced 46 bushels per acre and 80 pounds yielded 47 bushels per acre. Battle, 40 pounds yielded 47 bushels per acre; 60 pounds yielded 75.5 bushels per acre and 80 pounds yielded 58.5 bushels per acre.

NOTICE OF SALE

UNDER AND BY VIRTUE OF AN

order of the Superior Court of the State of North Carolina, in the special proceedings entitled: "C. J. Hamilton Et al. Vs. J. H. Moore Et al.", and being Special Proceedings No. 2879, the undersigned commissioner will on the 25th day of September, 1952, at 11:00 Noon, on the premises hereinafter described, offer for sale for cash to the highest bidder all those certain tract or parcels of land situated in Duplin County, State of North Carolina, Kenansville Township, and being described as follows:

FIRST TRACT: Beginning at a small Hickory, beginning corner of Amelia A. Hamilton, running along the line of the tract to a stake S. L. Hamilton's corner thence with his line South 89 1-2 East, 284 poles to a stake on the old line; thence with said old line South 1 West, 81 poles to a stake, thence with Amelia A. Hamilton's line, North 86 West, 283 poles to the beginning, containing 131 1-2 acres, more or less.

SECOND TRACT: Beginning where the western edge of the Rose Hill and Kenansville public road intersects the North edge of the Magnolia and Hallsville public road, near the Hamilton tract, the D. B. Hamilton tract, the S. L. Hamilton tract, thence South 81 West, 120 1-2 poles crossing the run of the line of the tract to the South 1-2 East, with the line of the 109 1-4 acres tract of Florence E. Hamilton 147 poles to the said Magnolia and Hallsville public road, thence along the same as it runs to the beginning, and being the same lands devised to D. B. Hamilton by Will of John S. Hamilton, recorded in Will Book 8, pages 609-613, of the Office of Clerk of Superior Court Duplin County.

A ten per cent deposit will be required of the successful bidder as evidence of good faith.

Advised this the 25th day of July, 1952.

R. D. Johnson, Commissioner
H. E. Phillips, Commissioner

Social Security May Help Finances Burial Servicemen

When the body of a serviceman who died overseas after June 24, 1950 is brought to the United States for burial, the Social Security Administration may repay part of the cost of the burial in certain cases, according to N. A. Avera, manager of the Wilmington social security office.

Ordinarily, a claim for the social lump sum for burial expenses must

be filed within two years after death. Recent amendments to the social security law, however, provide an extension of the time limit in cases where the body of a serviceman who died after June 24, 1950, is returned to the United States for reburial. In these cases the reimbursement may be applied for within two years of the date of burial or reburial rather than within two years after the date of death.

Where the serviceman is survived by a widow this provision will not ordinarily apply, since in these cases the lump sum is paid to her regardless of who pays the burial expenses.
