

NOTICE OF SALE
Under and by virtue of the power of sale contained in that certain Deed of Trust executed by Walter Houston and wife, Katie Marie Houston, to Vance B. Gavin, Trustee, and recorded in Public Registry of Duplin County in Book 479, page 180, to which reference is hereby had, default having been made in the payment of the note thereby secured and request having been made upon the undersigned trustee by the owner of said note to foreclose said instrument. The undersigned Trustee will offer for sale and will sell to the highest bidder for cash on Wednesday, December 10, 1952 at the courthouse door in Duplin County, North Carolina at 12:00 noon the following described tract or parcel of land:
A 1-3 undivided interest in all that certain tract or parcel of land containing 56 acres or less which is described in deed dated the 2nd day of February, 1946, from David Chambers and wife

Resigns
The announcement during the ground breaking ceremony that two units instead of one will be installed at the Wilmington steam electric plant means that practically all of the figures in your printed program have been doubted. The following statistics will give you some idea of how our plans for the new plant grew even before ground was broken for its construction:
These generators will have a capacity in excess of 100,000 kilowatts or 135,000 horsepower each. These two generators will be capable of producing over one and one half billion kilowatt hours a year when operating at full load for 85 per cent of the time.
At full load these boilers will convert over 220,000 gallons a day into steam. The total amount of water to steam per hour.
The water in these boilers will be converted to steam at 1600 lbs. per square inch pressure and 1000 degrees temperature.
The No. 1 boiler will be 170 feet high and the No. 2 boiler 134 feet high. The two will contain about 85 miles of steel pipe. The one smokestack serving two boilers will be 200 feet high. Water to cool the steam, after it has given up its available energy in the turbine, and convert it back to water will be pumped through the tubes of the condensers at the rate of 161,000,000 gallons per day. This amount of water would serve the city of Wilmington 32 days. After the water passes through the condenser, it will go back into the river.
At full load the boilers will consume approximately 1650 tons (27 railroad cars) of coal per day. This amount of coal would heat the average home 236 years.
The power will be generated at 13,800 volts and stepped up to 110,000 volts for transmission over the system.
The No. 1 unit is expected to begin operation in mid 1954 and the No. 2 unit approximately a year later.
At the peak of construction, there will be approximately 400 people working on this job.
The site is laid out for an ultimate of six units.
The intake and discharge tunnels for units 1 and 2 will be installed simultaneously.
This plant will be of the outdoor type. It will be different from other plants on our system in that it will be the slab type with no basement; that is, a concrete slab will be poured on the ground and the plant built on top of it.
The plant will be supported by 980 cast in place concrete piles extending to a depth of approximately 40 feet in the ground.
This plant will deliver over seven times as much dependable power annually as the government-owned Buggs Island Project.

Resigns
D. N. Howard, Sr., Field Scout of Tuscarora Council, Boy Scouts of America, has resigned his post to accept a similar position with the Oconeechee Council, Raleigh, North Carolina, effective November 15. Howard came to Goldsboro from Knoxville, Tennessee in January of 1950.
Colored Scouting has had a continual growth in the four Divisions of Tuscarora Council, made up of Duplin, Johnston, Sampson and Wayne counties. In 1950 there were 24 Scouting Units compared with 53 at present. The total colored membership in 1950 was 424 compared with 1024 boys registered as of October 31, 1952.
Mr. Howard wishes to express his sincere thanks to all Scout Leaders and friends for their splendid cooperation over the past three years. It is hoped that the wholehearted effort for Scouting will continue so that more of our boys will be trained to become better citizens and maintain the high ideals of Scouting.

WMU Meeting in Ingold on Thursday
The meeting of the Women's Missionary Union (WMU) was held in Ingold on Thursday evening. Mesdames Florence Register, Mason Brown, Ottis Parker, Cyrus Brock, Willie Brock, Roy Rodgers, Tommie Sandlin, Hez Dobson and Edwin Register.
Mr. and Mrs. Cyrus Brock and Mrs. Norma Gauer spent two days last week in Morehead City visiting their respective daughters.
Louis, a small son of Mr. and Mrs. Wilbur Brock went to a Wilmington hospital for head treatment last week. We hope him a speedy recovery.
Miss Louella Parker spent Sunday with Mary Lee Rouse.
Mrs. Leslie Rouse, Jr., of Winston Salem visited here over the week end.

Parker Heads Travel Meetings
State Advertising Director Charles Parker is chairman of a national meeting on the travel industry in San Diego, California, Nov. 18.
The meeting is in connection with the 12th annual convention of the National Association of Travel Organizations, of which North Carolina's advertising director is a member of the board of directors representing North and South Carolina, Florida, Georgia, Virginia, West Virginia, Puerto Rico and the Virgin Islands.
Among those on the program are: Beverly Grizzard, Director of the Florida State Advertising Commission; Joseph J. Horan, Director of the New York State Travel Bureau; Elisabeth Shoemaker, Manager of the Greater Vermont Association; Frensis Mooney, Assistant Director of the Missouri Division of Resources and Development; Robert J. Furlong, Executive Secretary of the Michigan Tourist Council; W. E. Barksdale, Director of the Mississippi Agricultural and Industrial Board; Lewis R. Cobb, Colorado Director of Publicity; Mrs. Virgene Robinson, Arkansas Director of Publicity, and Clifton

Against Law To Hitch Hike Rides
RALEIGH — The gesturing, upturned thumb, universally recognized highball among wanderers of the highway is strictly frowned upon in North Carolina. Fact is, it's against the law.
However, like many statutes, the law against soliciting rides from

thus drawing enforcement eyes to more pressing problems. And too, nearly everybody drives nowadays since the Department of Motor Vehicles knows officially of 1,226,339 vehicles. Among non-drivers, the old time shank's mare traveler is virtually unknown. Transients feel, if they don't own cars, there are plenty of others who do. Thus the declining, but aggressive corps of hitch hikers who unknowingly flout the law regularly.
College students are perhaps the worst offenders according to the State Highway Patrol. At football games they all but commandeer slow moving cars, creating additional hazards for hard pressed officers directing traffic. Fortunately a stern warning, with a hint of indictment, breaks up this gay game — sometimes. And it would indeed be an unobservant driver who failed to notice the platoon of Wake Forest students in Raleigh every afternoon. The young Deacon law students may not know it yet, but they are breaking a duly enacted state law.
The same situation prevails in West Raleigh where dozens of State College students bend their thumbs and break the law. In education centers throughout the state, week-end thumbers create minor traffic problems.
If there is a regular semi-organized corps of hitch hikers it would be students say extensive travelers.
And while most safety officials condemn the practice, it's often overlooked in blanket preparations for highway safety promotion. The Department of Motor Vehicles produces no statistics on fatalities and injuries among hitch-hikers. That some few are injured, and perhaps killed, every year goes without saying. Thus an appeal to those who thumb rides regularly to "cease and desist" is probably the best answer.
For the academic minded the manual of motor vehicle laws, in one short paragraph, presents the state's point of view on hitch hiking. In section 20-175 it reads: "No person shall stand in the travel portion of the highway for the purpose of soliciting a ride from the driver of any private vehicle."
And for the hair-splitter, the "travel portion" of the highway means right up to where the pavement ends at the shoulder.
In answer to many inquiries: How do you catch Red Snappers? Fish 'em just like you fish for sea bass in the Gulf Stream. Drift and bottom fish. The secret is in the bait. Red Snappers along the North Carolina coast prefer squid mince traffic problems.
—in large chunks.

GOOD MORNING YOUNG MAN, I HAVE A LITTLE PROBLEM FOR YOU!
And you've come to the right place, we reply, for there's no auto body problem too big or small for us. We've the experience, the "know-how" to put 'em rolling again.
