**Attention, Farmers!**

Do you want a special strain of EARLY CAL-WONDER PEPPER that ranks strictly in a class to itself - a strain that produces not only thick, heavy lobes, but likewise large sized pods that are ten days earlier and command top market prices?

We have a limited quantity of this seed that has just arrived. Surprisingly, it takes courage to sell quality! Everyone knows it is easier to buy a cheap product and sell for less, but the easiest way is not always the best - nor the safest. People, places and products are all judged by comparison. And just as dealers compare customers - customers compare dealers - and the products they offer. When the products handled by a dealer are of the type which have earned a name for themselves as desirable and as offering extra value, that product comes to be known as "a good product to buy."

For the past fifteen years we have been striving to handle only the best in not only peppers, but all other commercial vegetable seeds, and are proud of a reputation which has created top demand for these seeds in this as well as outlying territories.

That we are privileged to serve these "quality-minded customers" is a constant source of pride. And - it also indicates that these conscientious "quality-minded customers" know the wisdom of comparing real values instead of prices.

Remember, when you go to purchase your Pepper seed, there is no substitute for quality.

Mail inquiries and orders handled promptly.
