ENGINE OVERHAUL

Gives you "New Tractor" Power Again

An old adage says: "There's a time to fish and a time to mend your nets." You mend nets when you can't fish.

It's the same way with farming. Now the rush is over — get set for non-stop farming next spring.

If your tractor lags on the hard pulls, schedule it now for an engine overhaul. You'll be surprised how little it costs to put new life in your old tractor.

We don't just "fix it" — we repower it. Stop in and talk it over.

PRICE TOO HIGH
The main reason so few of us attain the pinnacle of success is because the cost is greater than we

are willing to pay.
Opposition is proof that you are on the right track.

ITS IN THE BOOK
I have heard that it is unlawful to park a car and fail to pull up the hand brake. Is this true?

F. Y. Monroe
Yes, Motor Vehicle Manual regulations, in describing the correct procedure for parking a motor vehicle, say you must first stop the engine and then "effectively" set the brakes. Under the same regulation the law says you must turn the front wheels toward the curb when parking on a grade.
