Household Hint

Rug cushions or pads placed under carpeting have many advantages that make them well worth the little extra expense. They prevent rugs from skidding, decrease noise, add to comfort in walking and give a luxurious thickness to floor coverings. Most important, a resilient rug cushion will lengthen the life of your carpet.

ARTHRITIS?

I have been wonderfully blessed in being restored to active life after being crippled in nearly every joint in my body and with muscular soreness from head to foot. I had Rheumatoid Arthritis and other forms of Rheumatism, hands deformed and my ankles were set. Limited space prohibits telling you more here but if you will write me I will reply at once and tell you how I received this wonderful relief.
