Facts As I See Them

Have you ever wondered how hard it is to keep up these "many payments?" Most everybody (or most everybody) think their problems are the most complicated; but, seems to me the most mysterious part is, how so much of a month can be left - after all the money is gone! It may be that there just is not so much to start out with.

You should never be in despair, think you're a failure or give up until you're losing all hope, or dead. It's courage that counts - success is seldom final or failure ever fatal. The two most things to remember is; those who think and never do - and those who do - and never think. We each individual have to work out our lives as best we can - and what a mess some of WE can make of it during a lifetime!

Remember FREE MATCHES in the lime light - a few weeks ago? Well, they are now about the only free interprises - and product - that can be given away with profits to everybody who handle them. It's interesting to know who invented them - 84 years ago, Mr. Joshua Pusey of Philadelphia took many

price not for sale of \$35,000. Can you mention any multimillion dollars a year business to be given away? Can't figure it all out - can you?

You've often heard the old sayings - about peoples having a "one track mind". That saying could cover many things - many different things - but the important things to remember is, it's not so bad if you keep your mind on the RIGHT track. If you do get lost somewhere on the way - for an up-to-date conversation - just listen to a group of young folks awhile.

Since man prefers suspense - better than the average meaning - he will not forget that bit of sugar - he expects from women - who likes to add a bit of salt to what he does and says to her - Mix salt, sugar and gossip - and what have you?????
