

## ATTENTION FARMERS!

We Wish To Announce The Appointment Of—

### J.M. Edgerton & Son Inc.

Goldsboro, N. C.  
AS DEALERS OF:

- Hardie Rain Control Irrigation Couplers, Valves and Fittings.
- Carter Irrigation Pumps.
- I.H. Power Units

### HARDIE COUPLERS GIVE YOU MORE IRRIGATION PER DOLLAR OF COST

Only Hardie Rain Control provides a coupler with adequate foot support, positive lock, no-blow-out gaskets, and that is attached without drilling, punching or welding. Slippage and pipe damage are eliminated by two-bolt ring clamp that holds steel hook. Can be coupled or uncoupled from middle of the pipe.

It will pay you to find out how Hardie Rain Control saves you labor, maintenance cost and makes water go further and do more. Hardie Rain Control fits any ground, is readily adjusted to any acreage.

### Rain Control Valves Stop Surging And Reduce Flow Resistance

Rain Control Valve design makes all other valves obsolete. Completely eliminates surging. Flow resistance is reduced far below the flow resistance caused by other valves. Rain Control Valves save money on every gallon of water.

Look to us for complete systems, couplers, valves, pipe fittings, and pumps. Let us help you plan your system.

## GRID TO DIAMOND - - - By Alan Mayer

**PAUL GIEL, THE FOOTBALL ALL-AMERICAN FROM MINNESOTA, WHO CAST HIS BASEBALL LOT WITH THE NEW YORK GIANTS FOR A REPORTED \$50,000, WHICH ISN'T BAD CASTING.**

THE FAST-BALLING YOUNG RIGHT-HANDER IS RATED THE EQUAL OF ROBIN ROBERTS WHEN IT COMES TO FLIPPING FOR MICHIGAN STATE. GIEL, WHO HAD A 10-8 RECORD AT MINNESOTA, WOULD NOT BE THE FIRST FOOTBALLER TO MAKE GOOD ON THE MOUND FOR THE GIANTS. CHRISTY MATHEWSON WAS THE STAR AT BUCKNELL.

St. Pauls Review, St. Pauls; Central Carolinian, Sanford; and the Sandhill Citizen, Aberdeen.

**We Get What We Deserve**

Rowland R. Hughes has one of the toughest and most responsible jobs in the country — Director, Bureau of the Budget. He recently said: "A point I wish strongly to emphasize is that this fiscal and budget task is one which requires teamwork. There are three distinct parties to it: the administration, of course; the Congress, definitely; but the public — the citizen — is equally important. How much can be done by the administration and the Congress is primarily dependent upon the support of public opinion."

Most men in political life keep their ears to the ground. They try to give their constituents and the voters at large what they think is wanted. To a very great extent, it is the people who lead — and their representatives in government who follow.

That is certainly true of our financial affairs as a nation. If we really want economical government, we will get it — if we want wasteful, paternalistic government, we will get that. It is true, of course, that everyone pays lip service to the cause of governmental economy.

It is equally true that, when the chips are down, we too often want all the economy confined to the other fellow — not to us. This "take it out of his pocket, not mine" attitude is largely the reason why it is so enormously difficult to even moderately reduce nonessential spending.

Here an old axiom applies with full force: We get the kind of government we deserve.

**YOUR KITCHEN— AND FARM MACHINERY**

The modern American kitchen is a miracle of labor-saving convenience. Electric ranges, refrigerators, washers and all manner of other appliances have transformed both the urban and rural home.

That kitchen, strange as the idea may seem, wouldn't be possible if it weren't for farm machinery —

## LAFF-A-DAY

Here's the reason. In this nation's early days, it took 65 farm workers to produce enough food for themselves and 15 others — now 15 farmers produce enough for themselves and 65 others. To come down to modern times, in the past 40 years farm output has doubled — while the number of manhours needed to achieve the enormous production has steadily declined. That means that vast armies of people have been able to take jobs in industry. They produce automobiles, stoves, TV sets and all the thousands and one other things that make for better living. To take one example, a modern combine saves in a single day enough manpower to manufacture a refrigerator. There would be only a comparative handful of people available to man the factories if we were still dependent on human and animal labor to do the jobs of the farm.

Farm output must be much greater still in the future — our soaring population makes that certain. And again machinery will make the task possible and at the same time leave plenty of workers for our other needs.

## DOGS

by Farley Manning

**SELF FEEDING**

Want to be away for the week end and need someone to feed the dog?

Don't worry about it. Just leave the hose running slowly to furnish fresh water and provide him with enough food and go ahead and have your fun.

And don't worry about the food spoiling, the dog over-eating or getting insufficient nourishment. For researchers in the Swift Nutritional Research Kennels have solved the problem for many dog owners who occasionally have to leave their pets on a run for a full day or longer.

The answer lies in the development of a new meal type dog food and subsequent tests that prove that it is still palatable when fed absolutely dry.

The new dog food was brought out a few years ago, making use of discoveries that had been made in research on a bland lard — one that wouldn't rancid when not refrigerated. Up until then, dry dog foods had lacked both the necessary ingredients to completely nourish a dog and the palatability that would make him willing to eat it

without water or milk being added. Of course you can't just buy a bag of meal, dump it in a feeder, and go off for the week end. Dogs, unlike humans, actually don't need variety in their diets and a dog that has been on one type of feed for a period of time may not like to change to another — in fact he may refuse to eat it for a while. Add to this the fact that if you have been feeding only once a day your dog may be inclined to eat all of everything put in front of him.

So try feeding the dry meal for a while when you can keep an eye on results before leaving him. And naturally, dogs being dogs, you will probably find that he tips over his feed dish, just for fun. A heavy dish will take care of this, or just attach a light dish to the floor.

## LAFF-A-DAY

"Good grief, Bascom, we left our truck inside!"

## Outlook For Tobacco Is Good In Greenville Section

Greenville, North Car. . . . U.S.A. Weather conditions prevailing over that section of Eastern North Carolina from which the Greenville Tobacco Market draws tobacco for its auction sales, during the month of July have been as follows:

A relatively dry June was followed by abundant rains during the month of July. Intermittent showers during the first part of July were

followed by general ground soaking rains on July 9-11, and another general ground soaking rain of three inches on July 15. This heavy rainfall has been followed by continued intermittent showers on July 16, 19, 20, 21 and 22.

The effect upon the tobacco crop in this section has been most grati-

fyng. Plants have responded in normal healthy growth, attaining a normal height and spread. Tops have filled out nicely, and with the proper seasons from now on this promise to be one of the best crops ever grown in this tobacco producing section.

An overall picture, at this time, of the tobacco crop in this section, this year, is for a crop of good quality, with a poundage approximately the same as last year's.

Some people are born great — some just grate on others. Truth is stranger than fiction to the average married woman.

The man who makes the best use of his time has most to spare. A little knowledge is sometimes a dangerous thing — to the party about whom it is known.
