

Facts As I See Them

By VIDA MILLOY

You know, some people are always "Crossing the Bridge before they get to it" if you are some of those — try to make sure there is a bridge — to cross! To most of us, the biggest — worries we have are the thought of bad things we might have happen to us — and never do. And it's very true — that THINGS are NEVER as bad as they seem, and never so bad that they couldn't have been worse — it's usually the way we

looks at things — that matters so much, anyway. So, it's much better to be cheerful — no matter what, even in sickness — and even in death . . . really where we need it most.

You know, many men — who have to take their wife to the Dr. because she is sick, thinks as soon as she gets able to cook, wash and scrub — she is well and out of danger again! She may be WELL — but NOT out of danger.

Have you lost — or never had — the art — of being contented? Well, if you have, just try to realize — just how you would feel IF you suddenly lost everything you had — and then get it all back again. Then IF you are happy — and would wish to multiply — it — you may first need to Divide it! Get what I mean?

Since there is NO security in this old world — the only thing there is for us is "Opportunity." If we cannot do anything at once — we certainly should be able to do something — at once! You know — it's not really the "Swelled Head" that hurts the wearers — it's the "Shrinking" of the head that hurts one in the long run . . .

I guess you've heard that a man's work is from sun to sun but Woman's work is never done — but it could be that most likely — some of it is work that she has asked her husband to do . . . But, that doesn't worry a husband half so much as letting her have the last word — providing — she ever gets around to it! Some husbands — retaliate — by telling their wives — that THEY — are just what SHE has made them! I'd better stop talking — about husbands — or get one!

Did you ever notice — that no matter how critical a husband gets of his wife he finds fault of her choice of a husband . . . ? ? ?

Have you ever had the feeling that people — didn't like you? If you have, try adding, subtracting and multiplying yourself — divide yourself a bit, and examine and see what you have left! Do you think you would find something

Why a modern woman has to be too fat — is such a mystery to man, especially about the "double chin" part — where he KNOWS she eats so much exercise — it may be — "double talk." He madder sometimes how Grand-pa put up with so much Lip and Fat — but about the only difference in some cases — is the Grandma — and her night — cap & lip, went on her head at night when she retired, instead TO IT! It seems though, the longer he lives — and the longer he is wrong — the more SURE he is that is positively — right, HE THINKS!

To me — there are far too many good people running around with too many irons in the fire — and none of them HOT! Just as it takes a lot of practice to learn how to dodge a Bill Collector — well enough to learn how to keep up with the JONES & SMITHS.

Trying for a success in any kind of venture is trying — but it's sorta — like a Turtle — it is gained and grows and moves only by sticking its neck out.

that you would like in someone else?

If you ever have to "eat your words" — remember, that man cannot survive on words — alone. But, if you are some of those who just have — to talk about someone — it's far better to talk OVER their heads — than behind — their backs! But, not quite — as much FUN — NO ? ? ? If you notice carefully, you can usually tell the size of a person by simply watching his temper — or the size of things which make them angry.

Had you ever noticed, that when you want a thing done, when you want it, the way you want it and like you want it done, do it yourself? You know, it's true, that when you want to make an easy job seem difficult — just keep putting it off from time to time. Most of us know that.

Why a modern woman has to be too fat — is such a mystery to man, especially about the "double chin" part — where he KNOWS she eats so much exercise — it may be — "double talk." He madder sometimes how Grand-pa put up with so much Lip and Fat — but about the only difference in some cases — is the Grandma — and her night — cap & lip, went on her head at night when she retired, instead TO IT! It seems though, the longer he lives — and the longer he is wrong — the more SURE he is that is positively — right, HE THINKS!

To me — there are far too many good people running around with too many irons in the fire — and none of them HOT! Just as it takes a lot of practice to learn how to dodge a Bill Collector — well enough to learn how to keep up with the JONES & SMITHS.

Trying for a success in any kind of venture is trying — but it's sorta — like a Turtle — it is gained and grows and moves only by sticking its neck out.

It doesn't make any difference how much safety is engineered into our roads and streets. It makes no difference what the automobile manufacturer does to put extra safety into a motor vehicle. The wrecker will still manage to pile up his auto and the persons inside.

So here's a weekday tip to all motorists. If you're planning a highway junket this weekend, be sure to drive at a reasonable speed and to observe the rules of the road. Don't you be a Weekend Wrecker.

The State Motor Vehicles Department warns car drivers that speeding can carry them faster toward a bad accident. It's silly to be careful. It's smart to be careful.

Overnight Leadership Institute To Be At Campbell College Sept. 7

The thirty-eight Baptist churches in the Eastern Baptist Association are hereby notified concerning the state Overnight Leadership Institute to be held at Campbell College on September 7-8 and September 10-11.

The W. M. U. president, the Young People's Director, the Community Missions chairman, the Stewardship chairman, the Mission Study chairman, the counselors for Y. W.

leaders and others will direct the various conference periods.

In order to get the full benefit, each leader or chairman will be expected to stay throughout the conference in the same class as the work is planned to be continuous. The work is not designed to offer much information nor inspiration to temporary "drop ins", but during the six hours—afternoon, evening, and morning—the full scope of each phase of work will be discussed thoroughly. The WHAT, WHY, HOW, WHEN AND WHERE OF W. M. U. work will be covered as related to the responsibility of each person attending the conference.

The Institute on Sept. 10-11 is the same as that offered Sept. 7-8. The large attendance demands duplicate programs. Approximately 800 local officers and chairmen will attend these two institutes.

The Institutes (same emphasis) will be held at Fruitland during the next two weeks for the leadership of the Piedmont section of state. The Eastern Institute was held last week at Chowan College.

Dove Hunting Begins Sept. 10

Dove hunting season for North Carolina, which this year will be a split season, will begin officially on September 10 and will continue through September 29. The second season begins on December 10 and closes on December 29.

Hunting begins at 12 noon each day and closes at sunset. The daily bag limit is 8 and the possession limit is also 8.

The Rail and Sora hunting season opens on September 1 and closes November 9. The daily bag for Rail is 15 for each person and the possession limit is 30. The daily bag limit for Sora is 25 also. Hunting for these birds begins 30 minutes before sunrise and ends each day at sunset.

FARMERS URGED TO WATCH WEEVILS

Boll weevils are out in large numbers in most North Carolina cotton fields, and farmers were urged this week to keep a close watch on the build-up of weevil infestations and to treat for control where necessary.

George Jones, in charge of entomology for State College Extension Service, writing in the latest edition of the Cotton News Letter, says that in at least one county as many as 32 weevils were found in every cotton square. "With squaring on the decline, square infestation rates may be high and reach 100 per cent even in treated fields," says Jones.

Cotton picking has already started in most southern North Carolina counties. Many plants have stopped producing young squares, but several half to full grown squares are present. These must be protected in order to produce a good yield.

In areas where rains have not fallen, plants are shedding leaves and the crop is rapidly maturing. In other areas, where adequate rain has fallen, plants are producing late squares and blooms.

He said in areas where early corn was planted and where corn and tobacco have already matured, infestation is extra heavy. The worms jump from corn and tobacco to cotton. They have been moving to cotton since July.

STEP UP TO DIESEL FARMING and SAVE

with the FORDSON MAJOR DIESEL

The Fordson Major Diesel gives you all the proved economies of diesel operation, like highest engine efficiency . . . lowest fuel cost for work done . . . long engine life . . . extra lugging power.

The Fordson Major Diesel also gives you easy starting, a built-in hydraulic system and 3-point hitch. And yet it's priced hundreds of dollars less than other diesel tractors with comparable power and equipment.

Find out more about this economical power that helps you get more work done in a day. Take a look below at a few of the implements that turn Fordson Major Diesel power into profit. Then call us for a free demonstration!

*Based on a comparison of list prices.

DEARBORN FMD MOLDBOARD PLOW

Rugged, heavy duty plow that turns clean-cut furrows . . . 3 at a time! It's a "lift type" plow that attaches quickly, raises and lowers hydraulically. Width and depth of cut accurately and easily controlled. Available with Standard Bottoms or Economy Bottoms using razor blade shares.

DEARBORN WHEEL TYPE TANDEM DISC HARROW

Tops for seed bed preparation. Good for contour, orchard and hillside discing. Positive depth control for uniform penetration. Rides on rubber to the field, on headland turns and over grassed waterways. Raises and lowers by Remote Hydraulic Cylinder. 9, 10 and 11-foot widths available.

DEARBORN FMD REAR ATTACHED MOWER

Smooth-running mower with "in line" power train. Attaches quickly—easily. Tractor hydraulic power raises and lowers cutter bar to clear rocks and stumps. Simple adjustments. Automatic safety release. Built to take hard service. 6 and 7-foot sizes.
