Most amazing of all - results were so thorough that sufferers made astonishing statements like "Flies have ceased to be a problem!" The secret is a new healing substance (Bio-Dyn*) - discovery of a world-famous research institute. This substance is now available in suppository or ointment form called Preparation H. About 16 per cent of the eggs produced in North Carolina are consumed on the farm where they are produced.

Approximately 28 per cent of the dairy cows in North Carolina were artificially inseminated in 1935.

Farmers can kill two birds with one stone by applying nitrogen side dressing and a weed control at the same time.

Experts estimate that with the

technology now available the average per acre yield of cotton in North Carolina can be doubled.
