EDITORIAL

Why Should We Support Sen. Kennedy And Terry Sanford On Tuesday, Nov. 8?

Next Tuesday, November 8, is one of the most important dates we as American citizens have ever faced. We are being called upon to vote for a man who will serve this Great America in the position of President of the United States for the next four years.

For President, we are considering the Democratic standard bearer Senator John F. Kennedy and his running mate for the Vice-Presidency Lyndon B. Johnson; or the Republican standard bearer Vice-President Richard M. Nixon and his unning mate for the Vice-Presidency Henry C. Lodge.

For this section of the United States, we must look to the Party which has proved in the past that it will represent all the people. We are principally agricultural, and it is first to this realm of service that we look.

The Republican Party, with the full backing of Mr. Nixon, has given to the farmers for the past eight years, the flexible farm price support system. It has not worked. In fact, while prices farmers receive for their products have gone down, the prices they have to pay for necessary equipment and supplies have gone up. This is a price cost squeeze which the farmer and small businesses absolutely cannot stand any longer. This is the Benson Agricultural Program which Mr. Nixon has endorsed and says will be continued for the next four years, if he is elected Tuesday.

Mr. Nixon has stated, and in front of 70,000,000 Americans in his first debate with Senator Kennedy, that he is for doing away with price support and acreage controls on all agricultural commodities, and that includes tobacco.

It just so happens that tobacco is the only agricultural program which has not cost the Federal Government one penny to operate, but yet the Republican party wants to see this destroyed.

Senator Kennedy has flatly stated, as the Democratic Presidential nominee, that he favors the return to 100 per cent parity for farmers and a rigid price support and acreage control. Mr. Kennedy has stated that he believes the tobacco program should be the model for all agricultural support and acreage control programs. And this newspaper agrees with that position 100 per cent.

It has been all the Democratic Congress could do to keep Mr. Benson and Mr. Nixon from destroying the tobacco program which means everything to the economy of Eastern North Carolina and the South.

Every businessman should also remember that if the tobacco program fails in Eastern North Carolina, then his business fails along with it because 90 per cent of the businesses in operation in Eastern North Carolina are either directly or indirectly connected with the tobacco program.

As for the experience of the two candidates, we suggest and believe that Mr. Kennedy has shown with his overwhelming knowledge and ability to react quickly to every situation, and his tremendous capacity and scope of thought, that he has the intelligence and experience exceeding that of Mr. Nixon. Mr. Nixon's claim to experience rests primarily in fact that he has been, in the words of Former President Harry Truman; "A do nothing Vice-President for eight years in a Do Nothing Republican administration."

You don't gain experience by having your foreign neighbors throw tomatoes and eggs at you on what is supposed to be a goodwill tour.

As it has turned out, Prestige of the United States abroad has turned out to be the big issue in this campaign.

How often, before the issue came to light and before the Presidential Campaign got underway, have you read where the United States was losing prestige abroad? We read about it numerous times.

Now when Mr. Kennedy says we are losing prestige abroad and among our allies, Mr. Nixon come along and says you are not supposed to talk about that. Why? Because Mr. Nixon knows it is the truth and he knows that if he runs under the Republican Party banner that it is while the Republican Party has been in power that this decline in prestige has been accomplished.

Mr. Kennedy says we have to go about building a stronger America at home, keep America Strong and by so doing we attract our friends and bring them closer to us rather than Communism.

Mr. Kennedy has not attacked America as being weak. He says that it is time we take a clear look at ourselves and see exactly where we stand. We are Americans and know how to cope, with any situation. But we cannot cope with a situation, be it bad or good, until we admit to ourselves what the situation really is.

This Great America was not built by men who were satisfied to stand still. It was built by men who were wanting to see the Nation on the move forward. Mr. Nixon says "we have never had it so good." Mr. Kennedy said, "There is a better America and a stronger America awaiting us provided we want to work for it."

A great deal has been said about Mr. Kennedy being a Catholic. This newspaper believes in God as the supreme being of the universe. It also is a firm believer in Jesus Christ, in which the Catholics also believe.

This newspaper also believes in the entire Constitution of the United States. It says in the Constitution of the United States.

Wheat Planting Time Is Here

Wheat planting time is here. Interest in wheat has been increasing for the past few years. In fact, interest began to increase when the variety Atlas 66 became available. Most of the acreage has been planted to this variety for the past several years.

A new variety, known as Wakeland, is now available. In 36 tests in the Coastal Plain area during the past five years, Wakeland has out-yielded all other wheat varieties. It has fair leaf rust resistance with some tolerance to mildew and mosaic. Tests show Wakeland to have as much winter hardiness as Atlas varieties. It matures 7 to 8 days ahead of Atlas 66 and is intermediate in winter growth habit. Wakeland is being suggested for rotation with soybeans or grain sorghum where an early variety is desired.

Farmers who grow wheat are being encouraged to try a portion of their crop in the Wakeland variety and compare it with the variety they have been planting.

Other varieties of wheat available for planting in the Coastal Plain in addition to Wakeland and Atlas 66 include Atlas 50, Coker 47-27, Taylor 49, and Anderson.
