## Record Rack

By Lucy Turner

Below I have the directions for making an attractive Record Rack. Teenagers especially enjoy making these for storing their many records.

A file for storing your collection of records can be made from a cereal box. Here are three simple steps to follow:

1. Cut off the top of the box
2. Cut diagonally down the back and front of the box.
3. Paint the boxes or cover them with paper and decorate with drawings if you like.

If you need a large file, tape several boxes together. These box files can also be used to keep a collection of special pictures, magazines, birthday cards, or any other kinds of materials you may want to keep.

## Birth Announcement

Mr. and Mrs. William Neil Rand of Fayetteville, announce the birth of a daughter, Susan Quinn on July 7 at Cape Fear Valley Hospital. Mrs. Rand is the former Miss Geraldine Cunn of Beulaville.

**Flameless Electric Heat Refreshingly CLEAN**

yet so reasonable in cost!

Your own experience assures you that electric house heating is clean. Like your other electric appliances, it is flameless, fumeless, completely free of smoke or soot.

But perhaps you are wondering: "can we afford it?"

The answer is yes. Electric heat is practical and compares in operating cost with that of homes now using flame-type heat.

And this is a major reason for its rapid acceptance. Scarcely heard of five years ago, today a million homes use electric heat. By 1970, estimates run to at least 6 million homes.

Is this clean, modern heat practical for the home you plan to build, buy or remodel? To help you decide, your CP&L representative can show case histories and operating costs. You'll also find that CP&L's special, low, heating rate can make your selection of flameless electric heat a prudent investment in living comfort.
