Treating Oats with "CERESAN" Sure Helps Get Better Stands

Don't take chances this year on losses from seed-borne Helminthosporium oat blight. Plant seed that's treated with DuPont "Ceresan" Seed Disinfectant and Protectant and be more certain of a good crop. "Ceresan" also checks smuts, seed decay and other diseases in oats. And it helps your seed to germinate better, no matter how bad the weather conditions at planting time. That's why "Ceresan" treated oats generally produce better stands and higher yields.

EQUALLY EFFECTIVE for wheat, barley, rye, millets and flax.
