NORTH CAROLINA UNLIMITED

VALUE INCREASED BY MANUFACTURE CLIMBS IN STATE!

Value added by manufacture in North Carolina in 1953 (the latest figures released) was \$2,274,019,000! This total was up 12.9 per cent over 1952! North Carolina ranked 14th among the states in value added by manufacture in 1953—which is something to brag about in view of strong competition. Our State's constantly increasing industrial production means more and more employment for our citizens—an important contribution in helping to make North Carolina a better place in which to work, play and live.

Another contribution to the more pleasant living for North Carolinians is the brewing industry's self-regulation program where brewers, wholesalers and retailers—in counties where malt beverages are permitted under State control—cooperate to maintain wholesome conditions for the legal sale of beer and ale.
