Mystery Farm Of The Weak

Reports from twenty counties of the Old Belt, including Orange, indicate that practically all areas have received excellent raine breaming the fir t is the month.

> Temperatures averaged almost normal and as a result there have been ideal growing conditions and tobacco has shown a very rapid growth. Very little disease and insect damage has been reported.

Cultivation has been completed and growers in most areas have topped their tobacco Harvesting has begun and some growers have pulled twice. Harvesting should be general in a week or ten days.
