

BOOSTS TO FLUORIDATION OF the Chapel Hill water supply have come from two quarters during the past week. The Durham-Orange County Medical Society re-affirmed a strong stand taken five years ago in favor of water fluoridation. And the Durham-Orange Drug Club adopted a resolution unanimously endorsing this treatment. In addition the pharmacists group plans to send a spokesman to the Durham and Chapel Hill ruling boards to state their case.

"IT'S NOTHING BUT A BEER can boulevard." That's what the woman said, and she meant it, too. She telephoned the office to complain about the unsightly rubbish-strewn condition of the newly-widened Raleigh Road boulevard leading into Chapel Hill. Her kindred spirit has several times called the News in the same vein about Durham Road. Suggestion from both sources: Arrest a few people for violating the state anti-littering law and it would likely keep the scene a bit more sightly.

SERIOUS DAMAGE WAS CAUS-ed to James Gattis' house at 702 Church St. where firemen answered an alarm yesterday morning. The blaze was caused by a defective chimney, according to Fire Chief J. S. Boone. Owner Wilson Caldwell.

SERIOUS DAMAGE WAS closely averted, however, in a mid-town auto wreck at the congested Town Hall intersection in Chapel Hill at the noon hour last Friday. A left-turning truck driven by John Wesley Kirk of Route One struck a car driven by Vonnie Bryan Smith and knocked it into the corner street marker, according to the investigating policemen. The truck driver was charged with failure to yield the right-of-way.

A NEW SERVICE STATION, now being erected by entrepreneur James Freeland, will be the first business establishment directly on the newly-completed section of Interstate Highway 85 in Orange County. The station is being built at the overpass of N. C. Highway 86 a mile south of Hillsboro.

THE UNIVERSITY OF NORTH Carolina figuratively orbited proudly with Astronaut John H. Glenn Jr. Saturday. Glenn and the other six Mercury Astronauts received training in celestial recognition on the campus here at various times in the past two years.

Anthony F. Jenzano, director of the Morehead Planetarium where Glenn studied, said yesterday that "we are happy with his success and to have contributed in some small way to the space program."

In a taped interview during his first studies here in February 1960, Glenn said, "The Morehead Planetarium was selected for this phase of the training program, because it had the highest qualifications of any available, and we could not get the information anywhere else." As principal spokesman for the Astronauts, Glenn praised both the cooperation and benefit of the Planetarium.

A look at the land of Orange...

'YOUNG FARMER' AND YOUNGER FARMER
—Robert Nichols Jr., 35-year-old-Cedar Grove community farmer, looks over his dairy pasture land with seven-year-old son Sammy. Mr. Nichols is Orange County nominee in the nationwide 'Outstanding

Young Farmer' selection sponsored by the Junior Chamber of Commerce. His 640-acre dairy and beef cattle farm was last week given a second place award in the statewide competition for the most-efficiently operated dairy farm. News Photo
