inner destiny?.

God pity our country when the hand-hade of the politician is more grati-ying to woman's beart then the pat-ar of children's rect.

Weman to Ruler Over All.

Why does weman chafe under re-straint of next. Why raville the hand of nature? Why discard the circus that divilination, has close to store the beginning of time? Why lay aside the hallowed garment that here, wheel, the tours of sorrow from the face of childhood? In the sacred embrace every generation has hidden the face in change clinging to its motherly The state of the s

Why this inordinate third for go or? Is not woman all powerful? M

made her ruler over all? Why crave authority when man howe down and warming her? Man has given woman his beart in the property of his memory. What more does she want?

Can man that it is his heart to look with pride upon the attenuate that his houseable mother in law was one of the most powerful political beases in the country. Up3 his distinguished grandmother was one of the ablest dilbusters in the Conate or that his mother was a noted warrior and her mans a terror to the enemy? Whither man a terror to the enemy? Whither are we drifting and where will we lead?

God Save Us Prom a Hen-Peaked Nation.

I tollow the plow for a living and my views may have in them the smell of the soil; my hair is terming white under the front of many winters and perhaps I am a little old-hablomed but I believe there is more motal in fluence in the straint books of the land. As an agency for morality, I wouldn't give one player of my anistly mother for all the suffragetlers constitutions and by-laws in the world. As a power for purifying society, I wouldn't give one player of my anistly mother for all the wemen's votes in Christophen. As an agency for spood accomment 2 wouldn't give the play of Great Britisin and Ireland an amount equal to the wealth of

ince of the provident of the United States. The deatiny of this nation lies to the Voltage and not in the legislative halls. The hearthelene and the family lithe very tendent and the family lithe will every tendent the source of our importation that the fact of the Apostles will ever thine brighter than the note of Compress. I have the acts of Compress. I have the rest of Compress. I have the sounter in a would be a statute hooft admindly grounding under its even weath, the hystotical cry of weather. If has thereby had not present in a lithest and did not prese amount for it twenty for years, we death survive the order, but without hours, of limition would willow and the God nave these United States from heavening a believe has another halp us keep mildes out of tragenessed of the farmers of the country.

If you are spending money trying to fool somebody, some body is fooling you.

craking to the Pale and Sickly

There should be an end of States. This country is so great, ly blessed in so many ways, that all that is needed for it to go forward by leaps and bounds is confidence and American back-bone. That there had been a depression because of the war in Europe has been a matter of temporary moment and this country has passed through that bravely, its face now set to the rising sun of an increased prosperity

In the early season of the de pression caused by the war the South was hit hardest because of the depreciation in the value of cotton. Since that time the price has moved up and the South having passed that period is now at the time of another season of crop making, buoyant in the prospects of the future. In manufacturing there has been given an impetus to production in many lines by reason of the was, and the reflex action from this has been to aid other lines of industry.

shape, and there is no excuse to talk hard times. The figures of our national wealth give an index to the general flate of affairs. For the past ten years the average increase in this namenal wealth has been \$8,000,000,000 And how great the increase ha been since 1860, when our population was a little above 31,000, 000, to this time when we have around 100,000,000, is shown by the fact that our wealth then about \$16,000,000,000, about \$514 per capita a year, and the latest estimate of the wealth of the country given by the Bureau of the Census is \$187,729, 000,000. The estimate of th wealth of the country made in 1904 was \$107,000,000,000, and hence the gain in the decade

of a mother's heart for righteomaness amount equal to the wealth of Germany, \$30,000,000,000 more than the motion are greater possibilities for spod government in her family of laughing children than in the oablines of the president of the United and four times the wealth of Italy. We could have bought with the increment of a single year nearly all the bonds that have been issued by the war-ring nutions to raise money to carry on the fight. And the dational wealth is still grown is the sun shines on the crops in the fields and as Europe pours her millions into our mills to pay for war material. News and Observer.

I-Introductory

"Enow America" is a slogan that a bar of fron and bent it into should ring out from every school poom, office, farm and shop in this state. No man can aspire to a higher loose than to become a capable office, and so one can morit so distinguished a title until he is well in-formed of the resources, possibilities and achievements of our country. This is a commercial age and civilization is bearing its most sold in truit in America. We are noted for our industrial achievements as Lays was noted for her pyramids; Jarone was noted for her pyramids; Jeruslem for her religion; Greece for her
art; Phoenicle for her fleets; Childea
for her natronomy and Jone for her
laws. Liktwine we have men who will
go down in the world's history as podgerful products of their age. For, staml
ing at the neutron of every signatiomovement that aways civilization had
great man. The greatest minds travel
in the greatest direction and the commercial goriness of this age would
have been the sculptors, polits, philosophers, architects, and avoids of
earlier civilizations.

As Michael Angelo took a rack and
with a chinel howed it into the finage

with a chisel howed it into the linns of an angel that ever beckens man-hind upward and onward. Hill took the desert of the Northwest and with bands of steal made it blossoise like a rose, dotted the valleys with happy homes and built cities in waste places. As Guttenberg took blocks of wood and whittled them jate an alphabet and made a printing press, that flashed education across the cu-tinent like a ray of light upill a new born word, McCormick took of an angel that ever beckens a a new born world, McCormick to

lesson and that of the previous month, have the keynote of the whole subject. "we cannot get nearer to God than our fulkers did, but we can bring God nearer to more points of life and more grades of men."

It is interesting to watch the forces of civilization bat iling for supremacy. The struggle now going on between the rubber and the iron tire promises to be the liteniest contest of the Twentich Century.

The struggle is a silent one and there are no war correspondents to write vivid descriptions of the conflict but, the results are more farreaching to present and future generations thin the war of Burope.

The rubber life has been maneuvering for point of attack for several years and has captured a few unimportant positions in traffic but it has now pitched a decisive battle with its iron competitor by hurling a million.

now pitched a decisive battle with its iron competitor by hurling a million "fitneys" at the street railways and the battle is raging from cean to occan. Upon the result of the struggle depends the future of the rubber tire. If it is compelled to retreat, its doom is sealed, but if it wins the battle it will revolutionize the transportation weekeds of the nation

transportation methods of this nation.

If the rubber lire conquers the street traffic its next struggle is with the railroads of the country, and then the greatest battle between economic forces ever fought out on the face of this earth is on for iron is the undisputed master in terratestant. disputed master to transpertation, and is fortified behind billions of dollars, and millions of men. Stephenson applied the steel tire to an iron rati in 1814, but it was 1869

before the golden spike was driven at Promoniory Point, which bound the country together with bands of the country together with bands of steel. It took the iron life first five or years to occup from coess to see an, but the rubber tirn while warm from the creative mind of the inventive gentus sped across that continent like an errow shot from the how of Ulysses. The roadbed was already prepared and therein lies the power of the rithier tire over that of iron, for government builds and maintains the public highway.

But from is a stubborn metal and its ans mantered every (which i that

But from its a stubborn methi and its has mantered overy suched ithat turns; has fought battles with every element above and beneath the earth and has never tasted the wormwood of deteat, and when rubber hurls its full, force against this monarch of the Mineral Kingdom, it may rebound to the factory stuined beyond recovery.

to the inclory stunned beyond recovery.

The rubber the first made the appearance on the hier ile but it proved a trivolous servant and was dismissed for manipulating. It has always been too lough inclined to revel in durury to be taken seriously as a utility machine and its reputation is not one to inspire confidence in heavy trans-

inspire confidence in history traffic parformance.

But to those who care to wart into dreamland, it is eschanting to note that there will be a margelium difference between a rubber and an iron age. The rubber thre will scatter the cities throughout the valleys for with transportation at every man's door, why a sity Is will inaverse the continent with a net work of Macadam highways as beautiful as the boulevard built by Napeleon. It will paralyze the law making budies of this nation to fine could be legislatures run without the realizeds to operate
