> Barrel Must Hold Three Bushels.

Washington, D. C., June 30---The new Federal law fixing a standard size for barrels, which is the first piece of national weight and measures legislation enacted by the Congress in 125 years, will come into operation tomoriow. The new law specifies that barrels used in the sale of fruits and vegtables must contain 7056 cubic inches, which means 105 quarts or approximately three bushels. The dimension of the barrels may differ, but they must hold the proper cubical contents. Fines of \$500 or imprisonment for six months are the penalties provided for violations of the law, which is to be regiously enforced in all the States.

In the past all sizes of barrels have been used, with the result that fraud and deception was so prevalent that the change became necessary. With the new law into effect and its enforce-"Perhaps the discussion of the ment by Tederal, State, county quorquestion had something to and city officials of weights and do with his downfall," somebody measures, with the co-operation of the trade-the socalled "standard" barrel as provided by the law will become a fixity in waterwagon occupants," said trade channels.
